100 Cars That Changed the World: The Designs, Engines, and Technologies That Drive Our Imaginations

Man-about-town and NYC men's style fixture Matt Hranek is back with his second book, A Man & His Car. Here is a beautiful homage to an object of men's obsession, told in firsthand and original interviews. Jay Leno, a major car collector and the host of Jay Leno's Garage, shares the story of his

Free Copy A Man His Car Iconic Cars And Stories From The Men Who Love Them

oldest car, a 1955 Buick Roadmaster that he bought for \$350, which he literally slept in before getting his break in L.A. Kevin Costner reveals that he got so attached to the iconic Shelby Mustang he drove in the movie Bull Durham, he bought it for his own personal collection. Franz von Holzhausen, chief designer at Tesla, who worked hand in hand with Elon Musk to design the Tesla Model S prototype, says that his love of cars started when he was two (as evidenced by a picture of him sitting in a high chair drawing a car). And as for Snoop Dogg and his 1965 Cadillac “Snoop DeVille” convertible—do we even need to explain? A Man & His Car includes visits to some of the most exclusive collections in the world—from that of the Petersen Automotive Museum to those of car manufacturers from Fiat to Ford—giving us access to Steve McQueen’s favorite car, a 1956 Jaguar XKSS; the 1971 DeTomaso Pantera that Elvis purchased for his then-girlfriend Linda Thompson (and which has two bullet holes in the steering wheel and one in the driver’s-side floorpan from when, after an altercation with Thompson, Presley fired three rounds into the interior when the car wouldn’t start); and a super-rare, 24-karat-gold-plated 1980 DeLorean DMC-12, a model that was sold exclusively to American Express Gold Card members through the 1980 American Express catalog, for an astronomical \$85,000 (equivalent to more than \$250,000 today). Exquisite photos of each car accompany each story, and since cars naturally hold more detail than watches, there will be more photos in this book—of the cars head-on, of their hood ornaments and wheels, and of course full-body shots. With Hranek’s storytelling, the cars become more than just vehicles for transportation and status symbols; they represent pop-culture moments, pioneering achievements, heirlooms, friendships, and more.

Six Men who Built the Modern Auto Industry

This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals-

especially those that are endangered. His powerful message, conveyed with humor, compassion, and art-to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits- from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.

Carrie

(Book Jacket Status: Jacketed) When it was published in 1955, "Lolita" immediately became a cause célèbre because of the freedom and sophistication with which it handled the unusual erotic predilections of its protagonist. But Vladimir Nabokov's wise, ironic, elegant masterpiece owes its stature as one of the twentieth century's novels of record not to the controversy its material aroused but to its author's use of that material to tell a love story almost shocking in its beauty and tenderness. Awe and exhilaration- along with heartbreak and mordant wit- abound in this account of the aging Humbert Humbert's obsessive, devouring, and doomed passion for the nymphet Dolores Haze. Lolita is also the story of a hypercivilized European colliding with the cheerful barbarism of postwar America, but most of all, it is a meditation on love-love as outrage and hallucination, madness and transformation. With an Introduction by Martin Amis "From the Hardcover edition."

In this fascinating book, New Yorker business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our world.

“I’ve paged through stacks of books on the history of watches. . . . But I hadn’t come across a book that actually moved me until I picked up *A Man and His Watch*. The volume is filled with heartfelt stories.”
—T: The New York Times Style Magazine Paul Newman wore his Rolex Daytona every single day for 35 years until his death in 2008. The iconic timepiece, probably the single most sought-after watch in the world, is now in the possession of his daughter Clea, who wears it every day in his memory. Franklin Roosevelt wore an elegant gold Tiffany watch, gifted to him by a friend on his birthday, to the famous Yalta Conference where he shook the hands of Joseph Stalin and Winston Churchill. JFK’s Omega worn to his presidential inauguration, Ralph Lauren’s watch purchased from Andy Warhol’s personal collection, Sir Edmund Hillary’s Rolex worn during the first-ever summit of Mt. Everest . . . these and many more compose the stories of the world’s most coveted watches captured in *A Man and His Watch*. Matthew Hranek, a watch collector and NYC men’s style fixture, has traveled the world conducting firsthand interviews and diving into exclusive collections to gather the never-before-told stories of 76 watches, completed with stunning original photography of every single piece. Through these intimate accounts and Hranek’s storytelling, the watches become more than just timepieces and status symbols; they represent historical moments, pioneering achievements, heirlooms, family mementos, gifts of affection, and lifelong friendships.

A gargantuan, mind-altering comedy about the Pursuit of Happiness in America Set in an addicts' halfway house and a tennis academy, and featuring the most endearingly screwed-up family to come along in recent fiction, *Infinite Jest* explores essential questions about what entertainment is and why it

has come to so dominate our lives; about how our desire for entertainment affects our need to connect with other people; and about what the pleasures we choose say about who we are. Equal parts philosophical quest and screwball comedy, *Infinite Jest* bends every rule of fiction without sacrificing for a moment its own entertainment value. It is an exuberant, uniquely American exploration of the passions that make us human - and one of those rare books that renew the idea of what a novel can do. The Complete Book of Porsche 911

DIY In *Porsche 911: 50 Years*, bestselling author Randy Leffingwell celebrates a half-century of one of the world's premier sports cars, focusing on the major themes that have defined Porsche's rear-engined wonder. He tells the whole story—design and development, racing and competition, engineering and technology, style and culture. All the iconic 911 models are included: the original 901 prototype that set the standard; the legendary RS models that made the little Porsche a dominant force on the world's racetracks; the infamous Turbo, the car that kept the performance flame alight during the dark, dismal decade of the 1970s; the fabled 959, the model that redefined the term "sports car"; the 993, last of the original air-cooled models; and the 996, 997, and 991, the liquid-cooled cars that brought the 911 into a new millennium. But beyond telling the story of the cars, this book also spotlights the people behind them: Ferdinand "Conrad" Porsche, the son of legendary Porsche founder Ferdinand "Ferry" Porsche, who co-designed the instantly recognizable 911 shape; Peter W. Schutz, the Porsche CEO who saved the 911 from extinction; and Dr. Helmuth Bott, the engineering genius behind

many of the groundbreaking technologies that have defined the 911, including fuel injection, turbocharging, and all-wheel-drive. Leffingwell also tells the story of the 911 community—the clubs and culture that surround the car. Together, all of these facets make Porsche 911: 50 Years the most essential book in any Porsche fan's library.

Ed Roth's Mysterion

In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. His name was Christopher Johnson McCandless. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a

Free Copy A Man His Car Iconic Cars And Stories From The Men Who Love Them

moose hunter. How McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. Digging deeply, he takes an inherently compelling mystery and unravels the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page. From the Trade Paperback edition.

The Wisdom of Crowds

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And

for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

But as a rapper, he's sometimes not given the credit he deserves for just how great an artist he's been for so long. This book wrestles with the biggest themes of JAY-Z's career, including hustling, and it recognizes the way that he's always weaved politics into his music, making important statements about race, criminal justice, black wealth and social injustice. The Time Keeper

From the author who's inspired millions worldwide with books like *Tuesdays with Morrie* and *The Five People You Meet in Heaven* comes his most imaginative novel yet, *The Time Keeper*--a compelling fable about the first man on Earth to count the hours. The man who became Father Time. In Mitch Albom's exceptional work of fiction, the inventor of the world's first clock is punished for trying to measure God's greatest gift. He is banished to a cave for centuries and forced to listen to the voices of all who come after him seeking more days, more years. Eventually, with his soul nearly broken, Father Time is granted his freedom, along with a magical hourglass and a mission: a chance to redeem himself by teaching two earthly people the true meaning of time. He returns to our world--now dominated by the hour-counting he so innocently began--and commences a journey with two unlikely partners: one a teenage girl who is about to give up on life, the other a wealthy old businessman who wants to live forever. To save himself, he must save them both. And stop the world to do so. Told in Albom's signature spare, evocative prose, this remarkably original tale will inspire readers everywhere to reconsider their own notions of time, how they spend it, and how precious it truly is.

Maestro: Bill Mitchell and the Iconic Cars of GM Styling

The first comprehensive biography of Weegee—photographer, “psychic,” ultimate New Yorker—from Christopher Bonanos, author of *Instant: The Story of Polaroid*. Arthur Fellig’s ability to arrive at a crime scene just as the cops did was so uncanny that he renamed himself “Weegee,” claiming that he

functioned as a human Ouija board. Weegee documented better than any other photographer the crime, grit, and complex humanity of midcentury New York City. In *Flash*, we get a portrait not only of the man (both flawed and deeply talented, with generous appetites for publicity, women, and hot pastrami) but also of the fascinating time and place that he occupied. From self-taught immigrant kid to newshound to art-world darling to latter-day caricature—moving from the dangerous streets of New York City to the celebrity culture of Los Angeles and then to Europe for a quixotic late phase of experimental photography and filmmaking—Weegee lived a life just as worthy of documentation as the scenes he captured. With *Flash*, we have an unprecedented and ultimately moving view of the man now regarded as an innovator and a pioneer, an artist as well as a newsman, whose photographs are among most powerful images of urban existence ever made.

Infinite Jest

This is the story of six extraordinary men who each built something from nothing, redefined the automotive industry after World War II, and redirected its course for the future: Henry Ford II (visionary autocrat with an iron will), Shoichiro Honda (most successful automotive entrepreneur since Henry Ford I), Eberhard von Kuenheim (founder of the modern BMW), Lee Iacocca, Ferdinand Piech (builder of Volkswagen Group) and Robert Lutz (who left retirement at 70 and is still highly influential at General Motors). What made them special was the sheer volume of fundamental change they brought to the largest industry in the history of the world. They not only re-shaped the auto business, the six made a sizable dent in the societies they lived in. To a man they were great cognitive thinkers. Their minds worked with animal speed, even instinct speed. But more than anything these were brave and

cantankerous souls who rode the waves of history. Each could see the future. They could just make it out-sometimes imperfectly, but could see it nonetheless. Then, an act of kindness, as spontaneous as the vicious taunts of her classmates, offers Carrie a chance to be a normal until an unexpected cruelty turns her gift into a weapon of horror and destruction that no one will ever forget.

A Man & His Car

A book examining the strange terrain of Nazi sympathizers, nonintervention campaigners and other voices in America who advocated on behalf of Nazi Germany in the years before World War II. Americans who remember World War II reminisce about how it brought the country together. The less popular truth behind this warm nostalgia: until the attack on Pearl Harbor, America was deeply, dangerously divided. Bradley W. Hart's *Hitler's American Friends* exposes the homegrown antagonists who sought to protect and promote Hitler, leave Europeans (and especially European Jews) to fend for themselves, and elevate the Nazi regime. Some of these friends were Americans of German heritage

who joined the Bund, whose leadership dreamed of installing a stateside Führer. Some were as bizarre and hair-raising as the Silver Shirt Legion, run by an eccentric who claimed that Hitler fulfilled a religious prophecy. Some were Midwestern Catholics like Father Charles Coughlin, an early right-wing radio star who broadcast anti-Semitic tirades. They were even members of Congress who used their franking privilege—sending mail at cost to American taxpayers—to distribute German propaganda. And celebrity pilot Charles Lindbergh ended up speaking for them all at the America First Committee. We try to tell ourselves it couldn't happen here, but Americans are not immune to the lure of fascism. Hitler's American Friends is a powerful look at how the forces of evil manipulate ordinary people, how we stepped back from the ledge, and the disturbing ease with which we could return to it.

When Ford launched the Mustang, it created an automotive revolution. Award-winning designer and stylist Gale Halderman was at the epicenter of the action at Ford, and, in fact, his initial design sketch formed the basis of the new Mustang. He reveals his involvement in the project as well as telling the entire story of the design and development of the Mustang. Authors and Mustang enthusiasts James Dinsmore and James Halderman go beyond the front doors at Ford into the design center, testing grounds, and Ford facilities to get the real, unvarnished story. Gale Halderman offers a unique behind-the-scenes perspective and firsthand account of the inception, design, development, and production of the original Mustang. With stinging

losses from the Edsel fresh in minds at Ford, the Mustang project was an uphill battle from day one. Lee Iacocca and his assembled team had a herculean task to convince Henry Ford II to take a risk on a new concept of automobile, but with the help of Hal Sperlich's detailed market research, the project received the green light. Henry Ford II made it clear that jobs were on the line, including Iacocca's, if it failed. The process of taking a car from sketch to clay model to prototype to preproduction and finally finished model is retraced in insightful detail. During the process, many fascinating experimental cars, such as the Mustang I two-seater, Mustang II prototype, Mustang Allegro, and Shorty, were built. But eventually the Mustang, based on the existing Ford Falcon, received the nod for final production. In a gala event, it was unveiled at the 1964 World's Fair in New York. The Mustang received public accolades and critical acclaim, and soon it became a runaway hit. After the initial success, Ford designers and Gale Halderman designed and developed the first fastback Mustangs to compliment the coupes. The classic Mustang muscle cars to follow, including the GT, Mach 1, and others, are profiled as well. The Mustang changed automotive history and ushered in the pony car era as a nimble, powerful, and elegantly styled sports coupe. But it could so easily have stumbled and wound up on the scrap pile of failed new projects. This is the remarkable and dramatic story of how the Mustang came to life, the demanding design and development process, and, ultimately, the triumph of the iconic American car.

Along the way, BMW would use that configuration to power groundbreaking machines like the R90S, R100RS, and R80GS. Beginning in 1983, they would add three- and four-cylinder machines to their offerings, culminating in today's spectacular S1000RR sport bike. My Dad Had That Car

Ed "Big Daddy" Roth (1932-2001) was a phenomenon. His body of work is still discussed in hot rodding, fine arts and pop culture circles and his cult following remains as devoted as it was during his career. His 1963 Mysterion show car--featuring two big-block Ford V8s--was his masterpiece and the story of its rise and brief existence is legendary. Though it was immortalized as a popular plastic model kit and is featured on several websites, little is known about Roth's magnum opus. There are a number of fanciful stories of its demise--mostly fiction. Combining history and shop class, this book provides a full investigation of Mysterion--both the legend and the machine itself. Drawing on interviews, magazine articles, photos, models and other (sometimes obscure) sources, the author pieces together the true story of the car, while documenting his own faithful bolt-by-bolt recreation of Mysterion.
