### A Bottle of Notes and Some Voyages

Gay romantic contemporary

### Left for Dead

This extraordinary work of investigative journalism takes readers inside America's isolated Mormon Fundamentalist communities, where some 40,000 people still practice polygamy. Defying both civil authorities and the Mormon establishment in Salt Lake City, the renegade leaders of these Taliban-like theocracies are zealots who answer only to God. At the core of Krakauer's book are brothers Ron and Dan Lafferty, who insist they received a commandment from God to kill a blameless woman and her baby girl. Beginning with a meticulously researched account of this appalling double murder, Krakauer constructs a multi-layered, bone-chilling narrative of messianic delusion, polygamy, savage violence, and unyielding faith. Along the way he uncovers a shadowy offshoot of America's fastest growing religion, and raises provocative questions about the nature of religious belief.

### Stat 212

A Journey From Lost to Found. At 26, Cheryl Strayed thought she had lost everything. In the wake of her mother's rapid death from cancer, her family disbanded and her marriage crumbled. With nothing to lose, she made the most impulsive decision of her life: to walk eleven-hundred miles of the west coast of America - from the Mojave Desert, through California and Oregon, and into Washington State - and to do it alone. She had no experience of long-distance hiking and the journey was nothing more than a line on the map. This account captures the agonies - both mental and physical - of her incredible journey.

## **The Billionaire Murders**

Canadian botanist, biochemist and visionary Diana Beresford-Kroeger's startling insights into the hidden life of trees have already sparked a quiet revolution in how we understand our relationship to forests. Now, in a captivating account of how her life led her to these illuminating and crucial ideas, she shows us how forests can not only heal us but save the planet. When Diana Beresford-Kroeger--whose father was a member of the Anglo-Irish aristocracy and whose mother was an O'Donoghue, one of the stronghold families who carried on the ancient Celtic traditions--was orphaned as a child, she could have been sent to the Magdalene Laundries. Instead, the O'Donoghue elders, most of them scholars and freehold farmers in the Lisheens valley in County Cork, took her under their wing. Diana became the last ward under the Brehon Law. Over the course of three summers, she was taught the ways of the Celtic triad of mind, body and soul. This included the philosophy of healing, the laws of the trees, Brehon wisdom and the Ogham alphabet, all of it rooted in a vision of nature that saw trees and forests as fundamental to human survival and spirituality. Already a precociously gifted scholar, Diana found that her grounding in the ancient ways led her to fresh scientific concepts. Out of that huge and holistic vision have come the observations that put her at the forefront of her field: the discovery of mother trees at the heart of a forest; the fact that trees are a living library, have a chemical language and communicate in a quantum world; the major idea that trees heal living creatures through the aerosols they release and that they carry a great wealth of natural antibiotics and other healing substances; and, perhaps most significantly, that planting trees can actively regulate the atmosphere and the oceans, and even stabilize our climate. This book is not only the story of a remarkable scientist and her ideas, it harvests all of her powerful knowledge about why trees matter, and why trees are a viable, achievable solution to climate change. Diana eloquently shows us that if we can understand the intricate ways in which the health and welfare of every living creature is connected to the global forest, and strengthen those connections, we will still have time to mend the self-destructive ways that are leading to drastic fires, droughts and floods.

## **On Desperate Ground**

A portrait based on personal stories by friends and family members traces the late comedian's passionate dedication to bringing laughter into the lives of others, his successes on SNL and in numerous top films, and the incapacity for moderation that led to his fatal battle with drugs and alcohol.

## **Maverick's**

A saga of survival, technological innovation, and breathtaking human physical achievement -- all set against the backdrop of a world headed toward war -- that became one of the most compelling international dramas of the 20th century. While tension steadily rose between European powers in the 1930s, a different kind of battle was raging across the Himalayas. Contingents from Great Britain, Nazi Germany, and the United States had set up rival camps at the base of the mountains, all hoping to become recognized as the fastest, strongest, and bravest climbers in the world. Carried on across nearly the entire sweep of the Himalayas, this contest involved not only the greatest

mountain climbers of the era, but statesmen and millionaires, world-class athletes and bona fide eccentrics, scientists and generals, obscure villagers and national heroes. Centered in the 1930s, with one brief, shining postwar coda, the contest was a struggle between hidebound traditionalists and unknown innovators, one that featured new techniques and equipment, unbelievable courage and physical achievement, and unparalleled valor. And death. One Himalayan peak alone, Nanga Parbat in Kashmir, claimed twenty-five lives in less than three years. Climbing the Himalayas was the Greatest Generation's moonshot -- one shrouded in the onset of war, interrupted by it, and then fully accomplished. A gritty, fascinating history sure to enrapture fans of Hampton Sides, Jon Krakauer, and Laura Hillenbrand, *The World Beneath Their Feet* brings this forgotten story back to life.

### **Nanotechnology for Chemical and Biological Defense**

New and unpredicted technologies are emerging at an unprecedented pace around the world. Communication of those new discoveries is occurring faster than ever, meaning that the unique ownership of a piece of new technology is no longer a sufficient position, if not impossible. In today's world, recognition of the potential applications of a technology and a sense of purpose in exploiting it are far more important than simply having access to it. Technological surprise has and will continue to take many forms. A plethora of new technologies are under development for peaceful means but may have unintended security consequences and will certainly require innovative countermeasures. A relevant example is the tremendous development in biotechnology that has occurred since the advent of recombinant DNA and tissue culture-based processes in the 1970s. If US government agencies and the defense and academic communities had more clearly recognized the potential for biotechnology to affect fundamental security and warfighting doctrines 20 years ago, the situation today could be very different. Defense against chemical and biological weapons – from both states and nonstate actors – currently presents a threat that is difficult to predict and for which traditional solutions are increasingly less effective. Nanotechnology has emerged as a well-funded discipline that, like biotechnology, carries the potential for groundbreaking applications and the potential for unpredictable harm. The world is likely 20 years away from the full impact of the nanotechnology on defensive capabilities.

### **Best Vacation That Never Was**

*Cold Fusion: Advances in Condensed Matter Nuclear Science* provides a concise description of the existing technological approaches in cold fusion or low energy nuclear reaction engineering. It handles the chemistry, physics, materials, and various processes involved in cold fusion, and provides a critical analysis of obtained theoretical and experimental results. The book has a very international appeal with the editor from France and an international pool of chapter authors from academia and industry. This book is an indispensable resource for researchers in academia and industry connected with combustion processes and synthesis all over the world. Systemizes the rapidly growing amount of information in cold fusion or low energy nuclear reaction technologies Defines the scientific fundamentals for understanding of cold fusion engineering Provides an overview of the history of the development of cold fusion engineering Written by an international pool of chapter authors

## Mountains of the Mind

The well-known humorist takes a witty, compassionate, poignant, and nostalgic look at the small and large triumphs of American family life in the 80s

## Under the Banner of Heaven

In the first part of this volume the nitrogen-containing compounds of molybdenum are described. The Mo-N system shows that  $\text{Mo}_3\text{N}_2$  and  $\text{Mo}_2\text{N}_3$  are the stable nitrides. Molybdenum metal dissolves nitrogen to some extent but only at high temperatures. To get better insight into the reactions between nitrogen and molybdenum, the solubility, diffusion, adsorption and desorption phenomena, and ion bombardment are included in the section of the Mo-N system.  $\text{Mo}_3\text{N}_2$  has a large range of homogeneity toward lower nitrogen concentrations. The black  $\text{Mo}_2\text{N}_3$  hexagonal  $\text{Mo}_2\text{N}_3$  has only a narrow range of homogeneity. In addition some molybdenum compounds containing nitrogen and oxygen are known. The second part contains a full description of the compounds of molybdenum with fluorine. The fluorides  $\text{MoF}_n$  with  $n \sim 2$  are metastable while those with  $n = 3$  to  $6$  are stable and have been observed in the Mo-F system. Pure  $\text{MoF}_3$  can exist without traces of oxygen, in contrast to earlier assumptions.  $\text{MoF}_3$  was unambiguously prepared and characterized in 1957. Its crystal structure is still unknown.  $\text{MoF}_3$  is often contaminated with the oxide fluoride  $\text{MoOF}_2$  and it is difficult to remove. Even small amounts affect the properties of  $\text{MoF}_3$ .  $\text{MoF}_3$ , which is liquid at room temperature and solidifies to a "plastic" crystal modification below ca.  $17^\circ\text{C}$ , is the most investigated of all the molybdenum fluorides.

## Twelve Years A Slave (Full Book and Comprehensive Reading Companion)

For the fiftieth anniversary of the completion of the Verrazano Narrows Bridge, a beautifully produced, heavily illustrated edition of Gay Talese's classic history of the iconic structure, now with a new introduction by the author. The Verrazano Narrows Bridge, linking the New York City boroughs of Brooklyn and Staten Island, is an engineering marvel. At 13,700 feet, it is the longest suspension bridge in the United States and the sixth longest in the world. But the sheer size of the bridge is only one part of its complicated, fascinating history. Renowned journalist Gay Talese chronicled the human drama of the bridge's completion: from the construction workers high on the beams to the backroom dealing that displaced whole neighborhoods to make way for the bridge, through to the opening of this marvel of human ingenuity and engineering. Now in a new, beautifully packaged edition featuring dozens of breathtaking photos and architectural drawings, *The Bridge* remains both a riveting narrative of politics and courage and a demonstration of Talese's consummate reporting and storytelling that will captivate new generations of readers.

## Above the Clouds

The 10-Step Program for Creating a Healthy Lifestyle Plan That Really Works The Dorm Room Diet Revised and Updated Edition Figuring out how to eat right and stay healthy on your own can be hard! Here is help from someone who's been there. Like many girls, Daphne Oz struggled with her weight as a teenager and hated the extreme restrictions of fad diets. She wanted to find a healthy lifestyle solution that would let her enjoy a full college experience without packing on the proverbial Freshman 15. But could it be done? With the help of her father and grandfather, both cardiac surgeons, and her mother and grandmother, both holistic nutrition advisors, Daphne developed a whole new approach to managing her weight. How well did it work? You be the judge: In her first semester of college, she not only skipped the typical beer-and-pizza-fueled weight gain—she lost 10 pounds and became healthier than she had ever been. The transition to college life presents a golden opportunity to seize control of your health for good, and now the secrets of Daphne's success are available to you in The Dorm Room Diet. Get inspired. Get informed. Get started! In this revised and updated edition of her national bestseller, Daphne shows you how to: stop eating out of emotional need navigate the most common danger zones for unhealthy eating, such as eating on the run, late-night studying, sporting events, and parties get the exercise you need, even in your dorm room choose vitamins and supplements wisely Daphne also includes recipes that you can prepare in your dorm room or kitchen (including vegan and gluten-free dishes), and an informative, new section on "conscious eating," explaining how your food choices affect your health and the planet. The Dorm Room Diet will empower you to use your newfound independence to create a healthy lifestyle while in college—and for the rest of your life.

### **The Nation's Choice, Phonics Library Level 1 Theme 10**

One of the most important discoveries of this century -- cold fusion -- was summarily rejected by science and the media before sufficient evidence had been accumulated to make a rational judgment possible. Enough evidence is now available to show that this rejection was wrong and that the discovery of a new source of clean energy may help solve some serious problems currently facing mankind. The book catalogues and evaluates this evidence and shows why the initial reaction was driven more by self-interest than fact. This book is essential reading for anyone who wants to understand the history and science behind the cold fusion controversy. In addition to the technological importance of the effect, the discovery of new ways to initiate nuclear reactions without producing significant radiation reveals an entirely new mechanism operating at the nuclear level in solid material. This new mechanism has important implications for an understanding of many other phenomena.

### **Couldn't Keep It to Myself**

"A riveting, terrifying, thrilling story of a netherworld that few people know about, and fewer will ever see . . . The soul of this book is as wild as the ocean itself." --Susan Casey, best-selling author of *The Wave: In Pursuit of the Rogues, Freaks, and Giants of the Ocean* An adrenaline-fueled tour of a vast, lawless and rampantly criminal world that few have ever seen: the high seas. There are few remaining frontiers on our planet. But perhaps the wildest, and least understood, are the world's oceans: too big to police, and under no clear international authority, these immense regions of treacherous water play host to rampant criminality and exploitation. Traffickers and smugglers, pirates and

mercenaries, wreck thieves and repo men, vigilante conservationists and elusive poachers, seabound abortion providers, clandestine oil-dumpers, shackled slaves and cast-adrift stowaways -- drawing on five years of perilous and intrepid reporting, often hundreds of miles from shore, Ian Urbina introduces us to the inhabitants of this hidden world. Through their stories of astonishing courage and brutality, survival and tragedy, he uncovers a globe-spanning network of crime and exploitation that emanates from the fishing, oil and shipping industries, and on which the world's economies rely. Both a gripping adventure story and a stunning exposé, this unique work of reportage brings fully into view for the first time the disturbing reality of a floating world that connects us all, a place where anyone can do anything because no one is watching.

### **Family**

Edge of the Map is equal parts inspiring, dramatic, and heartbreaking. One of America's greatest high altitude mountaineers, Christine Boskoff was at the top of her career when she and her partner died in an avalanche in 2006. Charismatic, principled, and humble, Boskoff was also a deeply loved role model to her climbing partners and the Sherpa community. Edge of the Map traces the sharp twists and turns in Boskoff's life, from her early years as a Lockheed engineer, through her first successes in the climbing world, to her purchase of Seattle-based Mountain Madness after owner and climber Scott Fischer died in the 1996 Everest disaster. Her life was one of constant achievement mixed with personal tragedy. The story follows Boskoff as she perseveres and moves on to even bigger peaks, earning acclaim as a world-class mountaineer, then later as she finds an alpine partnership with legendary Colorado climber Charlie Fowler.

### **Juicy and Delicious**

With its massive faces, punishing rocks, and treacherous currents, Maverick's presents a surfing challenge like no other. Author Matt Warshaw has updated his critically acclaimed illustrated history of Maverick's to cover important recent developments, and we've added a fresh new cover to kick this edition off in style. "A fascinating account," to quote Surfer magazine, it takes "a cue from Sebastian Junger's The Perfect Storm Warshaw focused on a single event and expands on it to illuminate an entire culture and its world beyond waves." The event was the death of celebrated surfer Mark Foo, one of those who congregate every winter to test themselves in the dark, foreboding waters. And what unfolds in Maverick's is no less than the story of big-wave surfing, from its ancient Hawaiian origins to modern tow-in riders. It's a book to be enjoyed not only by those who surf deep in the waves, but also by those whose taste for adventure is satisfied deep in the pages of a very good book.

### **The Outlaw Ocean**

A workbook for Stat 212 at Virginia Commonwealth University

## Three Cups of Deceit

Get to know 100 of the most exciting rising-star chefs from around the world - as selected by 20 culinary masters The international dining scene is a vast, ever-shifting landscape, and Today's Special is perfectly positioned to help readers navigate it. Twenty of the globe's leading chef-curators -- 10 men and 10 women -- have each selected five emerging chefs from around the world, showcasing a variety of styles of food, restaurants, and personalities. Each of the 100 selected chefs is profiled, with recipes, photographs, and menus, plus original commissioned essays that shed light on what makes a standout star in today's culinary realm. Today's Special is packed with more than 300 recipes and 500 images celebrating finished dishes, chef portraits, restaurant interiors, and more. The broad geographical reach of chefs and cuisines includes: Jeremy Chan of Nigeria-inspired Ikoyi London; Toyomitsu Nakayama of Toyo, Tokyo, Japan; Afro-fusion chef Dieuviel Malonga; Manoella Buffara of Brazil; New York-based British chefs Clare de Boer and Jess Shadbo

## The World Beneath Their Feet

With a new preface by the author • As featured in the upcoming motion picture Everest, starring Jason Clarke, Josh Brolin, John Hawkes, Robin Wright, Emily Watson, Keira Knightley, Sam Worthington, and Jake Gyllenhaal “I can tell you that some force within me rejected death at the last moment and then guided me, blind and stumbling—quite literally a dead man walking—into camp and the shaky start of my return to life.” In 1996 Beck Weathers and a climbing team pushed toward the summit of Mount Everest. Then a storm exploded on the mountain, ripping the team to shreds, forcing brave men to scratch and crawl for their lives. Rescuers who reached Weathers saw that he was dying, and left him. Twelve hours later, the inexplicable occurred. Weathers appeared, blinded, gloveless, and caked with ice—walking down the mountain. In this powerful memoir, now featuring a new Preface, Weathers describes not only his escape from hypothermia and the murderous storm that killed eight climbers, but the journey of his life. This is the story of a man’s route to a dangerous sport and a fateful expedition, as well as the road of recovery he has traveled since; of survival in the face of certain death, the reclaiming of a family and a life; and of the most extraordinary adventure of all: finding the courage to say yes when life offers us a second chance. Praise for Left for Dead “Riveting . . . [a] remarkable survival story . . . Left for Dead takes a long, critical look at climbing: Weathers is particularly candid about how the demanding sport altered and strained his relationships.”—USA Today “Ultimately, this engrossing tale depicts the difficulty of a man’s struggle to reform his life.”—Publishers Weekly

## Ocular Surface Disorders

## A Writer's Life

An impassioned and candid memoir by the influential writer shares his personal and professional life as he reflects on the events,

personalities, places, and ideas that have shaped his life and work, from the civil rights struggle and changing American sexual mores to memorable people, both famous and not, whom he has profiled. Reprint. 25,000 first printing.

## **The Chris Farley Show**

Solomon Northup was born a free black man. He was kidnapped, tortured, and sold into slavery. For 12 years, he was kept in bondage as a slave in Louisiana--Twelve Years a Slave is his moving and raw account of survival and life as a slave. This edition includes the full book as well as a comprehensive companion with historical notes, character overview, themes overview, and chapter summaries.

## **Annapurna, a Woman's Place**

No one writes about mountaineering and its attendant hardships and victories more brilliantly than critically acclaimed author Jon Krakauer. In this collection of his finest work from such magazines as Outside and Smithsonian, he explores the subject from the unique and memorable perspective of one who has battled peaks like K2, Denali, Everest, and, of course, the Eiger. Always with a keen eye, an open heart, and a hunger for the ultimate experience, he gives us unerring portraits of the mountaineering experience. Yet Eiger Dreams is more about people than about rock and ice—people with that odd, sometimes maniacal obsession with mountain summits that sets them apart from other men and women. Here we meet Adrian the Romanian, determined to be the first of his countrymen to solo Denali; John Gill, climber not of great mountains but of house-sized boulders so difficult to surmount that even demanding alpine climbs seem easy; and many more compelling and colorful characters. In the most intimate piece, “The Devils Thumb,” Krakauer recounts his own near-fatal, ultimately triumphant struggle with solo-madness as he scales Alaska's Devils Thumb. Eiger Dreams is stirring, vivid writing about one of the most compelling and dangerous of all human pursuits.

## **To Speak for the Trees**

When I entered the field of allergy in the early 1970s, the standard textbook was a few hundred pages, and the specialty was so compact that texts were often authored entirely by a single individual and were never larger than one volume. Compare this with Allergy Frontiers: Epigenetics, Allergens, and Risk Factors, the present s- volume text with well over 150 contributors from throughout the world. This book captures the explosive growth of our specialty since the single-author textbooks referred to above. The unprecedented format of this work lies in its meticulous attention to detail yet comprehensive scope. For example, great detail is seen in manuscripts dealing with topics such as “Exosomes, naturally occurring minimal antigen presenting units” and “Neuropeptide S receptor 1 (NPSR1), an asthma susceptibility gene.” The scope is exemplified by the unique approach to disease entities normally dealt with in a single chapter in most texts. For example, anaphylaxis, a topic usually confined to one chapter in most textbooks, is given five chapters in Allergy Frontiers. This approach allows the text to employ multiple contributors for a single topic, giving the reader the advantage of being introduced to more than one viewpoint regarding a

single disease.

## The Bridge

"The gripping articles collected in Classic Krakauer--originally published in magazines such as The New Yorker, Outside, and Smithsonian--show why he is considered a standard-bearer of modern journalism. Spanning an extraordinary range of subjects and locations, these pieces take us from a horrifying avalanche on Mount Everest to a volcano poised to obliterate a big chunk of Seattle; from a wilderness teen-therapy program run by apparent sadists to an otherworldly cave in New Mexico, studied by NASA to better understand Mars; from the notebook of one Fred Beckey, who catalogued the greatest unclimbed mountaineering routes on the planet, to the last days of legendary surfer Mark Foo. Rigorously researched and vividly written, marked by an unerring instinct for storytelling and scoop, these pieces are unified by the author's ambivalent love affair with unruly landscapes and his relentless search for truth"--

## The Dorm Room Diet

Current knowledge of the epidemiology, clinical expression, pathophysiology and available medical and surgical therapy for ocular surface diseases, providing an invaluable text for ocular surface specialists, general ophthalmologists, optometrists and residents.

## Where Men Win Glory

NEW YORK TIMES BESTSELLER • "A powerfully imagined novel . . . [a] profoundly moving book that engages the heights and depths of human experience."—Los Angeles Times It is September 8, 1943, and fourteen-year-old Claudette Blum and her father are among the thousands of Jewish refugees scrambling over the Alps toward Italy, where they hope to find safety now that the Italians have broken from Germany and made a separate peace with the Allies. The Blums will soon discover that Italy is anything but peaceful, as it quickly becomes an open battleground for the Nazis, the Allies, Resistance fighters, Jews in hiding, and ordinary Italian civilians trying to survive. Tracing the lives of a handful of fascinating characters—a charismatic Italian Resistance leader, a priest, an Italian rabbi's family, a disillusioned German doctor—Mary Doria Russell tells the little-known story of the vast underground effort by Italian citizens who saved the lives of 43,000 Jews during the final phase of World War II. A Thread of Grace puts a human face on history. Praise for A Thread of Grace "An addictive page-turner . . . [Mary Doria] Russell has an astonishing story to tell—full of action, paced like a rapid-fire thriller, in tense, vivid scenes that move with cinematic verve."—The Washington Post Book World "Hauntingly beautiful, utterly unforgettable."—San Francisco Chronicle "Rich . . . Based on the heroism of ordinary people, [A Thread of Grace] packs an emotional punch."—People "[A] deeply felt and compellingly written book . . . The progress of each character's life is marked or measured by acts of grace. . . . Russell is a smart, passionate and imaginative writer."—Cleveland Plain Dealer "A feat of storytelling . . . an important book [that] needs to be widely read."—Portland Oregonian "Mary Doria Russell's fans (and aren't we all?) will rejoice to see her new novel on the shelves. A Thread of Grace is as ambitious, beautiful, tense, and

transforming as any of us could have hoped.”—Karen Joy Fowler, author of *The Jane Austen Book Club* “A story of love and war, *A Thread of Grace* speaks to the resilience and beauty of the human spirit in the midst of unimaginable horror. It is, unquestionably, a literary triumph.”—David Morrell, author of *The Brotherhood of the Rose* and *First Blood*

## **The Science of Low Energy Nuclear Reaction**

This edition has been updated to reflect new developments and includes new material obtained through the Freedom of Information Act. Pat Tillman walked away from a multimillion-dollar NFL contract to join the Army and became an icon of post-9/11 patriotism. When he was killed in Afghanistan two years later, a legend was born. But the real Pat Tillman was much more remarkable, and considerably more complicated than the public knew. A stunning account of a remarkable young man's heroic life and death, from the bestselling author of *Into the Wild*, *Into Thin Air*, and *Under the Banner of Heaven*. From the Trade Paperback edition.

## **Eiger Dreams**

The artist describes his working methods, looks at eighteen of his completed large-scale projects, as well as unsited proposals, and explains their themes.

## **Mo Molybdenum**

The basis for the new documentary film, *Mountain: A Breathtaking Voyage into the Extreme*. Combining accounts of legendary mountain ascents with vivid descriptions of his own forays into wild, high landscapes, Robert McFarlane reveals how the mystery of the world's highest places has come to grip the Western imagination—and perennially draws legions of adventurers up the most perilous slopes. His story begins three centuries ago, when mountains were feared as the forbidding abodes of dragons and other mysterious beasts. In the mid-1700s the attentions of both science and poetry sparked a passion for mountains; Jean-Jacques Rousseau and Lord Byron extolled the sublime experiences to be had on high; and by 1924 the death on Mt Everest of an Englishman named George Mallory came to symbolize the heroic ideals of his day. Macfarlane also reflects on fear, risk, and the shattering beauty of ice and snow, the competition and contemplation of the climb, and the strange alternate reality of high altitude, magically enveloping us in the allure of mountains at every level.

## **Today's Special**

"Kilian Jornet is the most dominating endurance athlete of his generation."—NEW YORK TIMES "Inspiring and humbling"—ALEX HONNOLD  
The most accomplished mountain runner of all time contemplates his record-breaking climbs of Mount Everest in this profound memoir—an intellectual and spiritual journey that moves from the earth's highest peak to the soul's deepest reaches. Kilian Jornet has broken nearly

every mountaineering record in the world and twice been named National Geographic Adventurer of the Year. In 2018 he summited Mount Everest twice in one week—without the help of bottled oxygen or ropes. As he recounts a life spent studying and ascending the greatest peaks on earth, Jornet ruminates on what he has found in nature—simplicity, freedom, and spiritual joy—and offers a poetic yet clearheaded assessment of his relationship to the mountain . . . at times his opponent, at others, his greatest inspiration.

### **Edge of the Map**

- A fresh perspective on a famous father and a legacy forged on the icy slopes of Mount Everest, the world's highest peak In 1963, the world followed the first American Mount Everest Expedition, and watched as "Big Jim" Whittaker became the first American to stand on top of the world. He returned home a hero. *My Old Man and the Mountain* is Leif Whittaker's engaging and humorous story of what it was like to "grow up Whittaker"—the youngest son of Jim Whittaker and Dianne Roberts, in an extended family of accomplished climbers. He shares glimpses of his upbringing and how the pressure to climb started early on. Readers learn of his first adventures with family in the Olympic Mountains and on Mount Rainier; his close yet at times competitive relationship with his brother Joss; his battle with a serious back injury; and his efforts to stand apart from his father's legacy. With wry honesty he depicts being a recent college grad, still living in his parents' home and trying to find a purpose in life—digging ditches, building houses, selling t-shirts to tourists—until a chance encounter leads to the opportunity to climb Everest, just like his father did. Leif heads to Nepal with all the excitement, irony, boredom, and trepidation that are part of high-altitude climbing. Well-known guides Dave Hahn and Melissa Arnot figure prominently in his story, as does "Big Jim." But Leif's story is not his father's story. It's a unique coming of age tale on the steep slopes of Everest and a climbing adventure that lights the imagination and fills an emotional human endeavor with universal meaning.

### **Classic Krakauer**

"A chronicle of the extraordinary feats of heroism by Marines called on to do the impossible during the greatest battle of the Korean War."--Provided by publisher.

### **Developments in Electrochemistry**

Greg Mortenson, the bestselling author of *Three Cups of Tea*, is a man who has built a global reputation as a selfless humanitarian and children's crusader, and he's been nominated for the Nobel Peace Prize. But, as Jon Krakauer demonstrates in this extensively researched and penetrating book, he is not all that he appears to be. Based on wide-ranging interviews with former employees, board members, and others who have intimate knowledge of Mortenson and his charity, the Central Asia Institute, *Three Cups of Deceit* uncovers multiple layers of deception behind Mortenson's public image. Was his crusade really inspired by a desire to repay the kindness of villagers who nursed him back to health when he became lost on his descent down K2? Was he abducted and held for eight days by the Taliban? Has his charity built

all of the schools that he has claimed? This book is a passionately argued plea for the truth, and a tragic tale of good intentions gone very wrong. 100% of Jon Krakauer's proceeds from the sale of *Three Cups of Deceit* will be donated to the "Stop Girl Trafficking" project at the American Himalayan Foundation ([www.himalayan-foundation.org/live/project/stopgirltrafficking](http://www.himalayan-foundation.org/live/project/stopgirltrafficking)).

## **Allergy Frontiers: Classification and Pathomechanisms**

Martin Fleischmann was truly one of the 'fathers' of modern electrochemistry having made major contributions to diverse topics within electrochemical science and technology. These include the theory and practice of voltammetry and in situ spectroscopic techniques, instrumentation, electrochemical phase formation, corrosion, electrochemical engineering, electrosynthesis and cold fusion. While intended to honour the memory of Martin Fleischmann, *Developments in Electrochemistry* is neither a biography nor a history of his contributions. Rather, the book is a series of critical reviews of topics in electrochemical science associated with Martin Fleischmann but remaining important today. The authors are all scientists with outstanding international reputations who have made their own contribution to their topic; most have also worked with Martin Fleischmann and benefitted from his guidance. Each of the 19 chapters within this volume begin with an outline of Martin Fleischmann's contribution to the topic, followed by examples of research, established applications and prospects for future developments. The book is of interest to both students and experienced workers in universities and industry who are active in developing electrochemical science.

## **My Old Man and the Mountain**

This is the 20th-anniversary edition of team leader Arlene Blum's best-selling account of the history-making 1978 ascent of Annapurna by the American Women's Himalayan Expedition. A classic story in the annals of women's achievements, "Annapurna" was the first account of mountaineering triumph and tragedy to be told from a woman's perspective. A huge critical and commercial success, the original edition sold more than 65,000 copies. Updated now with a new foreword by the author to mark the 20th anniversary of the harrowing ascent, Annapurna is as timely and as riveting today as when it was first published. It is a story of challenge and commitment, told with passion, humor, and honesty.

## **The Wisdom of Insecurity**

Hushpuppy lives with his Daddy and his ghost Mamma on the edge of the earth. Life is juicy and delicious until Hushpuppy's dad gets sick, the world starts to fall apart, and prehistoric ice beasts begin to crawl out of the red Georgia clay. As Daddy gets weaker, the world becomes more fragile and nature itself begins to come unrendered. Hushpuppy and his friends must learn to care for each other while they battle the fearsome aurochs in this magical Southern fantasia that inspired the movie *Beasts of the Southern Wild*.

## A Thread of Grace

In a stunning work of insight and hope, New York Times bestselling author Wally Lamb once again reveals his unmatched talent for finding humanity in the lost and lonely and celebrates the transforming power of the written word. For several years, Lamb has taught writing to a group of women prisoners at York Correctional Institution in Connecticut. In this unforgettable collection, the women of York describe in their own words how they were imprisoned by abuse, rejection, and their own self-destructive impulses long before they entered the criminal justice system. Yet these are powerful stories of hope and healing, told by writers who have left victimhood behind. In his moving introduction, Lamb describes the incredible journey of expression and self-awareness the women took through their writing and shares how they challenged him as a teacher and as a fellow author. *Couldn't Keep It to Myself* is a true testament to the process of finding oneself and working toward a better day.

## Wild. Film Tie-In

"The perfect guide for a course correction in life, away from materialism and its empty promise" (Deepak Chopra), *The Wisdom of Insecurity* shows us how—in an age of unprecedented anxiety—we must embrace the present and live fully in the now in order to live a fulfilling life. Spending all our time trying to anticipate and plan for the future and to lamenting the past, we forget to embrace the here and now. We are so concerned with tomorrow that we forget to enjoy today. Drawing from Eastern philosophy and religion, Alan Watts shows that it is only by acknowledging what we do not—and cannot—know that we can learn anything truly worth knowing. "Perhaps the foremost interpreter of Eastern disciplines for the contemporary West, Watts had the rare gift of 'writing beautifully the unwritable.'" —Los Angeles Times

## Cold Fusion

**NATIONAL BESTSELLER** A top journalist crosses the yellow tape to investigate a shocking high-society crime. Billionaires, philanthropists, socialites . . . victims. Barry and Honey Sherman appeared to lead charmed lives. But the world was shocked in late 2017 when their bodies were found in a bizarre tableau in their elegant Toronto home. First described as murder-suicide — belts looped around their necks, they were found seated beside their basement swimming pool — police later ruled it a staged, targeted double murder. Nothing about the case made sense to friends of the founder of one of the world's largest generic pharmaceutical firms and his wife, a powerhouse in Canada's charity world. Together, their wealth has been estimated at well over \$4.7 billion. There was another side to the story. A strategic genius who built a large generic drug company — Apotex Inc. — Barry Sherman was a self-described workaholic, renowned risk-taker, and disruptor during his fifty-year career. Regarded as a generous friend by many, Sherman was also feared by others. He was criticized for stifling academic freedom and using the courts to win at all costs. Upset with building issues at his mansion, he sued and recouped millions from tradespeople. At the time of his death, Sherman had just won a decades-old legal case involving four cousins who wanted 20 percent of his fortune. Toronto Star investigative journalist Kevin Donovan chronicles the unsettling story from the beginning, interviewing family members, friends, and

colleagues, and sheds new light on the Shermans' lives and the disturbing double murder. Deeply researched and authoritative, *The Billionaire Murders* is a compulsively readable tale of a strange and perplexing crime.
