The Queen of October

Bob Tarte had his first encounter with a cat when he was two and a half years old. He should have learned his lesson then, from Fluffy. But as he says, “ I listened to my heart instead, and that always leads to trouble. ” In this tell-all of how the Tarte household grew from one recalcitrant cat to six—including a hard-to-manage stray named Frannie—Tarte confesses to allowing these interlopers to shape his and his wife ’ s life, from their dining habits to their sleeping arrangements to the placement and furriness of their furniture. But more than that, Bob begins seeing Frannie and the other cats as unlikely instructors in the art of achieving contentment, even in the face of illness and injury. Bewitched by the unknowable nature of domesticated cats, he realizes that sometimes wildness and mystery are exactly what he needs. With the winning humor and uncanny ability to capture the soul of the animal world that made *Enslaved by Ducks* a success, Tarte shows us that life with animals gives us a way out of our narrow human perspective to glimpse something larger, more enduring, and more grounded in the simplicities of love—and catnip.

Teaching Sucks - But We Love It Anyway! a Little Insight Into the Profession You Think You Know

The Fire Rises. And it is time for the voices of teachers to be heard. "I find it fascinating, and a bit insulting," confides Frank Stepnowski, the iconoclastic author of *Why Are All the Good Teachers Crazy* and *S.C.R.E.W.E.D., An Educational Fairytale*, "that so many people feel so enabled to criticize teachers. Folks get their homes repaired multiple times, but they don't automatically think they could be construction workers, plumbers, etc. People and their family members undergo surgeries and visit hospitals, but they don't instantly assume they could be doctors. I could go on and on and yet, because they went to school, or have children in school, legions of people feel like they know what it is to be a teacher. They're wrong; and the evidence is in both the children they send us, and the fact that they stand idle, ignorant to so many "educational" decisions being made about our children that could irreversibly damage future generations." *Teaching Sucks - But We Love It* is an unapologetic retaliation to those that would blame teachers exclusively for the ills that plague modern education, a wake-up call

to the uninformed masses, and a love letter to those good teachers that continue to fight the good fight in the face of nearly insurmountable odds, in a nation that seems to increasingly devalue their importance.

Teaching and Learning in the Elementary School

Why can't we look away? Whether we admit it or not, we're fascinated by evil. Dark fantasies, morbid curiosities, Schadenfreude: As conventional wisdom has it, these are the symptoms of our wicked side, and we succumb to them at our own peril. But we're still compelled to look whenever we pass a grisly accident on the highway, and there's no slaking our thirst for gory entertainments like horror movies and police procedurals. What makes these spectacles so irresistible? In *Everyone Loves a Good Train Wreck*, the scholar Eric G. Wilson sets out to discover the source of our attraction to the caustic, drawing on the findings of biologists, sociologists, psychologists, anthropologists, philosophers, theologians, and artists. A professor of English literature and a lifelong student of the macabre, Wilson believes there's something nourishing in darkness. "To repress death is to lose the feeling of life," he writes. "A closeness to death discloses our most fertile energies." His examples are legion, and startling in their diversity. Citing everything from elephant graveyards and Susan Sontag's *On Photography* to the Tiger Woods sex scandal and *Steel Magnolias*, Wilson finds heartening truths wherever he confronts death. In *Everyone Loves a Good Train Wreck*, the perverse is never far from the sublime. The result is a powerful and delightfully

provocative defense of what it means to be human—for better and for worse.

Teaching and Learning K-8

In summer of 2000, legal secretary Donna Moffett answered an ad for the New York City Teaching Fellows program, which sought to recruit "talented professionals" from other fields to teach in some of the city's worst schools. Seven weeks later she was in a first grade classroom in Flatbush, Brooklyn, nearly completely unprepared for what she was about to face. New York Times education reporter Abby Goodnough followed Donna Moffett through her first year as a teacher, writing a frontpage, award-winning series that galvanized discussion nationwide. Now she has expanded that series into a book that, through the riveting story of Moffett's experiences, explores the gulf between the rhetoric of education reform and the realities of the public school classroom. Ms. Moffett's *First Year* is neither a Hollywood- friendly tale of 'one person making a difference,' nor a reductive indictment of the public education system. It is rather a provocative portrait of the inadequacy of good intentions, of the challenges of educating poor and immigrant populations, and of a well-meaning but underprepared woman becoming a teacher the hard way. While the story takes place in New York, Ms. Moffett's first year is a metaphor for the experiences of teachers everywhere in America, one that illuminates the philosophical, economic, political, and ideological dilemmas that have come more and more to determine their experience —and their students' experiences — in the classroom.

Teach Like Your Hair's on Fire

An elderly widow discovers a new sense of purpose when a series of wayward young people come to stay in her Vermont home in this "truly engrossing novel" (Library Journal). Sarah Lucas imagined the rest of her days would be spent living

peacefully in her rural Vermont home in the steadfast company of her husband. But now, with Charles ' s sudden passing, seventy-five-year-old Sarah is left inconsolably alone. As grief settles in, Sarah ' s mind lingers on her past: her imperfect but devoted fifty-year marriage to Charles; the years they spent raising their three very different children; and her childhood during the Great Depression, when her parents opened their home to countless relatives and neighbors. So, when a variety of lost souls come seeking shelter in Sarah ' s own big, empty home, her past comes full circle. As this unruly flock forms a family of sorts, they—with Sarah—nurture and protect one another, all the while discovering their unsuspected strengths and courage. In the tradition of Jane Smiley and Sue Miller, Kate Maloy has crafted a wise and gratifying novel about a woman who gracefully accepts a surprising new role just when she thought her best years were behind her.

Rise and Shine

Conversations About Being a Teacher

For decades teachers and parents have accepted the judgment that some students just aren't good at math. John Mighton—the founder of a revolutionary math program designed to help failing math students—feels that not only is this wrong, but that it has

become a self-fulfilling prophecy. A pioneering educator, Mighton realized several years ago that children were failing math because they had come to believe they were not good at it. Once students lost confidence in their math skills and fell behind, it was very difficult for them to catch up, particularly in the classroom. He knew this from experience, because he had once failed math himself. Using the premise that anyone can learn math and anyone can teach it, Mighton's unique teaching method isolates and describes concepts so clearly that students of all skill levels can understand them. Rather than fearing failure, students learn from and build on their own successes and gain the confidence and self-esteem they need to be inspired to learn. Mighton's methods, set forth in *The Myth of Ability* and implemented in hundreds of Canadian schools, have had astonishing results: Not only have they helped children overcome their fear of math, but the resulting confidence has led to improved reading and motor skills as well. *The Myth of Ability* will transform the way teachers and parents look at the teaching of mathematics and, by extension, the entire process of education.
