Amazing world of dinosaurs

The author argues that we can better understand a people if we know how they see and use plants. In *Discovering Aboriginal Plant Use*, Clarke dips into his field journals to provide a rich account of journeys, as both anthropologist and ethnobotanist, that span the temperate, arid and tropical zones of Australia and neighbouring landmasses. He describes the cultural and natural heritage of each region, on

the plants used by Aboriginal people that contribute to their distinctiveness.

"Convincing Ground" pulses with love of country. In this powerful, lyrical and passionate new work Bruce Pascoe asks us to fully acknowledge our past and the way those actions continue to influence our nation today, both physically and intellectually. The book resonates with ongoing debates about identity, dispossession, memory and community. Pascoe draws on the past through a critical examination of major historical works and witness accounts and finds uncanny parallels between the techniques and language used there to today's national political stage. He has written the book for all Australians, as an antidote to the great Australian inability to deal respectfully with the nation's constructed Indigenous past. For Pascoe, the Australian character was not forged at Gallipoli, Eureka and the back of Bourke, but in the furnace of Murdering Flat, Convincing Ground and Werribee. He knows we can't reverse the

past, but believes we can bring in our soul from the fog of delusion. Pascoe proposes a way forward, beyond shady intellectual argument and immature nationalism, with our strengths enhanced and our weaknesses acknowledged and addressed.

Volume 40 of Reviews in Mineralogy and Geochemistry compiles and synthesizes current information on sulfate minerals from a variety of perspectives, including crystallography, geochemical properties, geological environments of formation, thermodynamic stability relations, kinetics of formation and dissolution, and environmental aspects. The first two chapters cover crystallography (Chapter 1) and spectroscopy (Chapter 2). Environments with alkali and alkaline earth sulfates are described in the next three chapters, on evaporites (Chapter 3), barite-celestine deposits (Chapter 4), and the kinetics of precipitation and dissolution of gypsum, barite, and celestine (Chapter 5). Acidic environments are the theme for the next four chapters, which cover soluble metal salts from sulfide oxidation (Chapter 6), iron and aluminum hydroxysulfates (Chapter 7), jarosites in hydrometallurgy (Chapter 8), and alunite-jarosite crystallography, thermodynamics, and geochronology (Chapter 9). The next two chapters discuss thermodynamic modeling of sulfate systems from the perspectives of predicting sulfate-mineral solubilities in waters covering a wide range in composition and concentration (Chapter 10) and predicting interactions between sulfate solid solutions and aqueous solutions (Chapter 11). The concluding chapter on stable-isotope systematics (Chapter 12) discusses the utility of sulfate minerals in understanding the geological and geochemical processes in both high- and low-temperature environments, and in unraveling the past evolution of natural systems through paleoclimate studies. The review chapters in this volume were the basis for a short course on sulfate minerals sponsored by the Mineralogical Society of America (MSA) November 11-12, 2000 in Tahoe City, California, prior to the Annual Meeting of MSA, the Geological Society of America, and other associated societies in nearby Reno, Nevada. The conveners of the course (and editors of this volume of Reviews in Mineralogy and Geochemistry), Alpers, John Jambor, and Kirk Nordstrom, also organized related topical sessions at the GSA meeting on sulfate minerals in both hydrothermal and low-temperature environments.

The study of mental imagery has been a central concern of modern psychology, but most of what we know concerns visual imagery. A number of researchers, however, have recently begun to explore auditory imagery; this foundation-level volume presents their work. The topics covered are diverse, a reflection of the fact that auditory imagery seems relevant to numerous research domains -- from the ordinary memory rehearsal of undergraduates to the delusional voices of schizophrenics, from music imagery to imagery for speech. The chapters also address the parallels (and contrasts) between visual and auditory imagery, the relations between "inner speech" and overt speech, and between the "inner ear" and actual hearing. This book provides a valuable resource for students in many areas: imagery, working memory, music, speech, auditory perception, schizophrenia, or deafness.

A practical handbook for every new manager charged with leading teams to creative brilliance, from the author of *The Accidental Creative* and *Die Empty*. New managers in creative fields got the job because they were good at being makers--and learned to strategize their time, relationships, and mindset to produce the best creative work possible on their own. But when they're put in charge, the rules change, and they must unlearn their hard-won working habits in favor of new ones, and navigate a minefield of complex relational dynamics with colleagues and bosses. Successful leaders of creative teams have mastered the difficult transition from doing the work to leading the work, and this book shows how. Todd Henry picks up where *The Accidental Creative* left off, and provides an indispensable handbook of on-the-ground, tactical advice for new managers of creatives. He draws from interviews with brilliant leaders and his experience consulting in creative organizations to share a wealth of practical advice, including:

- Why conflict can be a good thing, and how to manage it in a healthy way.
- How to build time and attention buffers to protect your team's ability to do its best work.
- How to deal with the imbalance of power on your team, and manage inevitable struggles that arise.
- How to create "hunting trails" that will keep your team inspired and motivated to deliver brilliant work.
- Why you should still "get your hands dirty", even as you strive to remove yourself from the work.
- Why you should fight to measure value, not time, when evaluating your team's work.

A New York Times Notable Book In medieval England, a runaway scholar-priest named Nicholas Barber has joined a traveling theater troupe as they make their way toward their liege lord's castle. In need of money, they decide to perform at a village en route. When their traditional morality plays fail to garner them an audience, they begin to stage the "the play of Thomas Wells"--their own depiction of the real-life drama unfolding within the village around the murder of a young boy. The villagers believe they have already identified the killer, and the troupe believes their play will be a straightforward depiction of justice served. But soon the players soon learn that the details of the crime are elusive, and the lines between performance and reality become blurred as they discover, scene by scene, line by line, what really happened. Thought-provoking and unforgettable, Morality Play is at once a masterful work of historical fiction, a gripping murder mystery, and a literary work of the first order.
