The Lord God Made Them All

Let Sleeping Vets Lie

A few months of married bliss, a lovers' nest in Darrowby and the wonders of home cooking are rudely interrupted for James Herriot by the Second World War. From the author whose books inspired the BBC series All Creatures Great and Small, Vets Might Fly, James Herriot's fifth volume of memoirs relocates him to a training camp somewhere in England. And in between square pounding and digging for victory, he dreams of the people and livestock he left behind him.

The Rime of the Ancient Mariner

Perfect for fans of *The Salt Path* and *The Outrun*, this book is a life-affirming exploration of wild landscapes, what it means to be different and, above all, how we can all learn to make peace within our own unquiet minds. 'A windswept tale, beautifully told' Raynor Winn - *The Salt Path* 'A manifesto for the value of difficult people. I loved it' Amy Liptrot - *The Outrun* In August 2015, Katherine May set out to walk the 630-mile South West Coast Path. She wanted to understand why she had stopped coping with everyday life; why motherhood had been so overwhelming and isolating, and why the world felt full of inundation and expectations she can't meet. Setting her feet down on the rugged and difficult path by the sea, the answer begins to unfold. It's a chance encounter with a voice on the radio that sparks a realisation that she has Asperger's Syndrome. *The Electricity of Every Living Thing* tells the story of the year in which Katherine comes to terms with her diagnosis. It leads to a re-evaluation of her life so far - a kinder one, which finally allows her to be different rather than simply awkward, arrogant or unfeeling. The physical and psychological journeys become inextricably entwined, and as Katherine finds her way across the untameable coast, she also finds the way to herself. What readers are saying about *The Electricity of Every Living Thing*: 'This book showed a realistic view of how autism feels to some people, and it's explained so well' 'The astonishing sensitivity and awareness in her writing, both about the beautiful landscapes and nature around on her walks, and in relation to her family, friends and self put paid to many outdated

The Real James Herriot

This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals-especially those that are endangered. His powerful message, conveyed with humor, compassion, and art- to know these animals is to save them.Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits- from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.

The Hidden Brain

A portrait of the author of "All Creatures Great and Small" by his son describes the life and times of the Yorkshire veterinarian, his devotion to his family, his work as a rural veterinarian, and his writings.

All Things Bright and Beautiful

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as

individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

Miss Peregrine's Home for Peculiar Children

The #1 New York Times –bestselling author of *All Creatures Great and Small* reflects on the rewards of training the next generation of veterinarians. As an aging James Herriot begins to see more house pets than livestock, the challenge of treating animals—and reassuring their owners—provides plenty of excitement, mystery, and moments of sheer delight. After building up his own practice, the renowned country vet begins to teach a new generation about a business both old-fashioned and very modern. He watches with pride as his own children show a knack for medicine, and remarks on the talents and quirks of a string of assistants. There is no perfecting the craft, since people and their animals are all remarkably different, but Herriot proves that the best healers are also the most compassionate.

All Things Wise and Wonderful

heartwarming, funny, and tragic animal patients. For over forty years, generations of readers have thrilled to Herriot's marvelous tales, deep love of life, and extraordinary storytelling abilities. For decades, Herriot roamed the remote, beautiful Yorkshire Dales, treating every patient that came his way from smallest to largest, and observing animals and humans alike with his keen, loving eye. In *All Creatures Great and Small*, we meet the young Herriot as he takes up his calling and discovers that the realities of veterinary practice in rural Yorkshire are very different from the sterile setting of veterinary school. Some visits are heart-wrenchingly difficult, such as one to an old man in the village whose very ill dog is his only friend and companion, some are lighthearted and fun, such as Herriot's periodic visits to the overfed and pampered Pekinese Tricki Woo who throws parties and has his own stationery, and yet others are inspirational and enlightening, such as Herriot's recollections of poor farmers who will scrape their meager earnings together to be able to get proper care for their working animals. From seeing to his patients in the depths of winter on the remotest homesteads to dealing with uncooperative owners and critically ill animals, Herriot discovers the wondrous variety and never-ending challenges of veterinary practice as his humor, compassion, and love of the animal world shine forth. James Herriot's memoirs have sold 80 million copies worldwide, and continue to delight and entertain readers of all ages.
