It's Not All Downhill From Here

Every president has had a unique and complicated relationship with the intelligence community. While some have been coolly distant, even adversarial, others have found their intelligence agencies to be among the most valuable instruments of policy and power. Since John F. Kennedy's presidency, this relationship has been distilled into a personalized daily report: a short summary of what the intelligence

apparatus considers the most crucial information for the president to know that day about global threats and opportunities. This top – secret document is known as the President's Daily Brief, or, within national security circles, simply “ the Book. ” Presidents have spent anywhere from a few moments (Richard Nixon) to a healthy part of their day (George W. Bush) consumed by its contents; some (Bill Clinton and George H. W. Bush) consider it far and away the most important document they saw on a regular basis while commander in chief. The details of most PDBs are highly classified, and will remain so for many years. But the process by which the intelligence community develops and presents the Book is a fascinating look into the operation of power at the highest levels. David Priess, a former intelligence officer and daily briefer, has interviewed every living president and vice president as well as more than one hundred others intimately involved with the production and delivery of the president's book of secrets. He offers an unprecedented window into the decision making of every president from Kennedy to Obama, with many character – rich stories revealed here for the first time.

The Sawbones Book

A rant-ish memoir by the veteran stand-up comedian and former cohost of That Metal Show, with a foreword by Jim Norton Twitter Trolls. Facebook Freaks. Instagram Exhibitionists. These are just a few of the creatures our technology-obsessed culture has spawned in its quest to simplify our lives. The madness is so universal now that everyone has dealt with it. You log in to Facebook, read a stupid post, and immediately want to tell your "friend" to go have relations with himself. Sure, social media may keep us connected, but it is a breeding ground for idiots, and these idiots have crowd-sourced a storm of useless information, corny jokes, and douchebag drama that's wasting our time and screwing with our peace of mind. Thankfully, popular comedian and television host Jim Florentine has a solution for those of us on the verge of bashing our iPhones to bits. In *Everybody Is Awful*, Florentine attacks awful people and awful situations with the same biting satire and cringe-worthy humor that made him famous on television shows like *Crank Yankers*, *Meet the Creeps*, and *That Metal Show*. Along the way, *Everybody Is Awful* takes readers through the author's formative years, a time filled with rebellion and horrible behavior, to the crazy early days of his career as a stand-up comedian. Florentine also recounts how he developed an obsession with pranks that morphed into his uniquely vigilante style of comedy and made him one of the most legendary prank callers of all time. Florentine excels at channeling the core rage we all feel at the seemingly small annoyances of life, and his fans love the cathartic experience of his hilarious ranting and raving, a tradition continued in *Everybody Is Awful*. Acting as a de facto therapist, Florentine diagnoses awful behavior, shames awful people, and offers comedic takes on how to reclaim our lives from it all.

A compelling, often hilarious and occasionally horrifying exploration of how modern medicine came to be! Wondering whether eating powdered mummies might be just the thing to cure your ills? Tempted by those vintage ads suggesting you wear radioactive underpants for virility? Ever considered drilling a hole in your head to deal with those pesky headaches? Probably not. But for thousands of years, people have done things like this—and things that make radioactive underpants seem downright sensible! In their hit podcast, *Sawbones*, Sydnee and Justin McElroy breakdown the weird and wonderful way we got to modern healthcare. And some of the terrifying detours along the way. Every week, Dr. Sydnee McElroy and her husband Justin amaze, amuse, and gross out (depending on the week) hundreds of thousands of avid listeners to their podcast, *Sawbones*. Consistently rated a top podcast on iTunes, with over 15 million total downloads, this rollicking journey through thousands of years of medical mishaps and miracles is not only hilarious but downright educational. While you may never even consider applying boiled weasel to your forehead (once the height of sophistication when it came to headache cures), you will almost certainly face some questionable medical advice in your everyday life (we ' re looking at you,

Everything's Trash, But It's Okay

The co-host of the popular NPR podcast Planet Money provides a well-researched, entertaining, somewhat irreverent look at how money is a made-up thing that has evolved over time to suit humanity's changing needs. Money only works because we all agree to believe in it. In Money, Jacob Goldstein shows how money is a useful fiction that has shaped societies for thousands of years, from the rise of coins in ancient Greece to the first stock market in Amsterdam to the emergence of shadow banking in the 21st century. At the heart of the story are the fringe thinkers and world leaders who reimagined money. Kublai Khan, the Mongol emperor, created paper money backed by nothing, centuries before it appeared in the west. John Law, a professional gambler and convicted murderer, brought modern money to France (and destroyed the country's economy). The cypherpunks, a group of radical libertarian computer programmers, paved the way for bitcoin. One thing they all realized: what counts as money (and what doesn't) is the result of choices we make, and those choices have a profound effect on who gets more stuff and who gets less, who gets to take risks when times are good, and who gets screwed when things go bad. Lively, accessible, and full of interesting details (like the 43-pound copper coins that 17th-century Swedes carried strapped to their backs), Money is the story of the choices that gave us money as we know it today.

Everybody's Got Something

Okay. Harken to my tale. Once upon a time (a couple of years ago) there were these brothers who had a bunch of really successful podcasts, and they decided to do a new podcast with their dad, where they all played D&D together as a family, and lo, this new podcast was called The Adventure Zone, and verily did it get downloaded over 10 million times, and wow did it totally eat the brains of all who listened, because: It was just. That. Rad. AND THEN did these guys team up with artist Carey Pietsch, and make a graphic novel where the weirdly sweet and brilliant but also super SUPER vulgar and honestly kind of bizarre story of The Adventure Zone got adapted into a goofy, innovative, and compelling graphic novel! Let no man deny that it was the best idea ever, right? Reader, we're publishing it.

The President's Book of Secrets

The world is increasingly unthinkable, a world of planetary disasters, emerging pandemics, and the looming threat of extinction. In this book Eugene Thacker suggests that we look to the genre of horror as offering a way of thinking about the unthinkable world. To confront this idea is to confront the limit of our ability to understand the world in which we live - a central motif of the horror genre. In the Dust of This Planet explores these relationships between philosophy and horror. In Thacker's hands, philosophy is not academic logic-chopping; instead, it is the thought of the limit of all thought, especially as it dovetails into occultism, demonology, and mysticism. Likewise, Thacker takes horror to mean something

beyond the focus on gore and scare tactics, but as the under-appreciated genre of supernatural horror in fiction, film, comics, and music.

Medallion Status

Both unflinchingly funny and deeply heartfelt, *MEDALLION STATUS* is a hilarious, thoughtful examination of status, fame, and identity. It's about the weird trauma that comes with success that feels unseemly to discuss (because who will sympathise with you?); about the addiction to status that sometimes (always) follows success; and about the way we all deal with those moments in public and private life when we realise we don't quite have it anymore.

For many tabletop RPG players, the joy of an in-depth game is that anything can happen. Typical adventure modules include a map of the adventure 's primary location, but every other location?whether it's a woodland clearing, a random apothecary or the depths of a temple players elect to explore?has to be improvised on the fly by the Game Master. As every GM knows, no matter how many story hooks, maps or NPCs you painstakingly create during session prep, your best-laid plans are often foiled by your players' whims, extreme skill check successes (or critical fails) or their playful refusal to stay on task. In a game packed with infinite possibilities, what are GMs supposed to do when their players choose those for which they're not prepared? The Game Master 's Book of Random Encounters provides an unbeatable solution. This massive tome is divided into location categories, each of which can stand alone as a small stop as part of a larger campaign. As an example, the " Taverns, Inns, Shops & Guild Halls " section includes maps for 19 unique spaces, as well as multiple encounter tables designed to help GMs fill in the sights, sounds, smells and proprietors of a given location, allowing for each location in the book to be augmented and populated on the fly while still ensuring memorable moments for all your players. Each map is presented at scale on grid, enabling GMs to determine exactly where all of the characters are in relation to one another and anyone (or anything) else in the space, critical information should any combat or other movement-based action occur. Perhaps more useful than its nearly 100 maps, the book's one-shot generator features all the story hooks necessary for GMs to use these maps as part of an interconnected and contained adventure. Featuring eight unique campaign drivers that lead players through several of the book's provided maps, the random tables associated with each stage in the adventure allow for nearly three million different outcomes, making The Game Master's Book of Random Encounters an incredible investment for any would-be GM. The book also includes a Random NPC Generator to help you create intriguing characters your players will love (or love to hate), as well as a Party Makeup Maker for establishing connections among your PCs so you can weave together a disparate group of adventurers with just a few dice rolls. Locations include taverns, temples, inns, animal/creature lairs, gatehouses, courts, ships, laboratories and more, with adventure hooks that run the gamut from frantic rooftop chases to deep cellar dungeon-crawls, with a total of 97 maps, more than 150 tables and millions of possible adventures. No matter where your players end up,

they'll have someone or something to persuade or deceive, impress or destroy. As always, the choice is theirs. But no matter what they choose, with *The Game Master's Book of Random Encounters*, you'll be ready.

Everybody Matters

We often dismiss history as dull or irrelevant, but our modern disengagement from the past puts us fundamentally out of step with the long witness of the Christian tradition. Yet, says Margaret Bendroth, the past tense is essential to our language of faith, and without it our conversation is limited and thin. This accessible, beautifully written book presents a new argument for honoring the past. The Christian tradition gives us the powerful image of a vast communion of saints, all of God's people, both living and dead, in vital conversation with each other. This kind of connection with our ancestors in the faith, Bendroth maintains, will not happen by wishing or by accident. She argues that remembering must become a regular spiritual practice, part of the rhythm of our daily lives as we recognize our world to be, in many ways, a gift from others who have gone before.

In the second *Adventure Zone* graphic novel (adapted from the McElroy family's wildly popular D&D podcast), we rejoin hero-adjacent sort-of-comrades-in-arms Taako, Magnus, and Merle on a wild career through a D&D railroad murder mystery. This installment has a little of everything: a genius child detective, an axe-wielding professional wrestler, a surly wizard, cursed magical artifacts, and a pair of meat monsters. You know, the usual things you find on a train. Hot on the heels of *The Adventure Zone: Here There Be Gerblins*, the smash hit graphic novel that launched the series, *The Adventure Zone: Murder on the Rockport Limited* picks up the saga where volume 1 left off. Both books are based on "The Adventure Zone," a tabletop RPG comedy podcast with downloads numbering in the tens of millions and an army of passionately devoted fans. With art and co-adaptation from Carey Pietsch, the McElroys are once again turning their raucous freewheeling D&D campaign into some damn fine comics.

Now a New York Times bestseller and a major docuseries The 2017 American Book Award Winner from the Before Columbus Foundation A Washington Post notable nonfiction book for 2016 A Goodreads Best of 2016 Nonfiction Finalist A Kobo Best Book of 2016 Includes an update from Rabia on Adnan's vacated murder conviction in summer 2016 Serial only told part of the story In early 2000, Adnan Syed was convicted and sentenced to life plus thirty years for the murder of his ex-girlfriend Hae Min Lee, a high school senior in Baltimore, Maryland. Syed has maintained his innocence, and Rabia Chaudry, a family friend, has always believed him. By 2013, after almost all appeals had been exhausted, Rabia contacted Sarah Koenig, a producer at This American Life, in hopes of finding a journalist who could shed light on Adnan ' s story. In 2014, Koenig's investigation turned into Serial, a Peabody Award-winning podcast with more than 500 million international listeners But Serial did not tell the whole story. In this compelling narrative, Rabia Chaudry presents new key evidence that she maintains dismantles the State's case: a potential new suspect, forensics indicating Hae was killed and kept somewhere for almost half a day, and documentation withheld by the State that destroys the cell phone evidence -- among many other points -- and she shows how fans of Serial joined a crowd-sourced investigation into a case riddled with errors and strange twists. Adnan's Story also shares Adnan ' s life in prison, and weaves in his personal reflections, including never-before-seen letters. Chaudry, who is committed to exonerating Adnan, makes it clear that justice is yet to be achieved in this much examined case.

Thirteen Storeys

It was the perfect storm. A group of executives with the support of a Fortune 500 rival plotting corporate espionage to destroy a leading insurance brokerage firm. A new U.S. Attorney out to cement his professional status. An FBI team needing a collar. A prosecutor trying to fix his tarnished reputation. A judge looking to solidify his reputation on the bench. A defense attorney worried more about the bottom line than winning his case. And the self-made CEO who didn't see it coming--until the tsunami hit and Michael Segal was drowned in a flood of greed, avarice, deception, self-interest, and an unbridled climb to power. Pulitzer Prize-winning author Maurice Possley tells how the case against Michael Segal was laid, brick by brick, defying justice, evidence and even common sense after he refused to wear an FBI wire to entrap colleagues. As gripping as a legal thriller by Scott Turow or John Grisham, this nonfiction account of how an innocent man was used as a tool by a few unscrupulous people to bolster their own ambitions should raise alarms about how easily the U.S. criminal justice system, at times, can be used and abused for personal gain. Long before facts lost their meaning, Segal's story stood as a terrifying testament to how far manipulating the truth can go and how badly it can hurt the innocent. The United States v. Segal should never have been a case at all. The evidence against Segal was flimsy at best, there were no victims, no misrepresentations, no one lost any money, and it was an accounting crime without any government forensics and incomplete and inaccurate evidence. So why did a man who had no record and was known for his business and philanthropic pursuits receive a prison sentence of 10 years? As Possley takes us down the wormhole into the case, he reveals: The FBI tried to coerce Segal to secretly tape colleagues and business and political acquaintances. Former trusted, top-level employees conspired with a Fortune 500 competitor for months to take Segal's company--or take him down. Segal's personal attorney was bugged and attorney-client privilege went ignored. A former employee hacked into confidential files and delivered hundreds of documents to the group that wanted to seize or destroy his company--and was never even arrested. The stolen files contents were shared with the FBI and prosecutor. The prosecutor never used a government-sanctioned analysis of the supposed accounting

Online PDF Everybody Has A Podcast Except You A How To Guide From The First Family Of Podcasting

crime. No qualified government or independent forensic accounting of his business was ever presented to the court by the government. Hundreds of stolen, company emails, including those with attorney protected, were found on a rival's server. The chief prosecutor had a record of past prosecutorial misconduct allegations. Key witnesses changed their testimonies after being contacted by the FBI. After Segal's lawyers made pretrial motions for his constitutional rights, prosecutors filed superseding indictments. At a time when criminal justice reform is being discussed by all the presidential candidates, Segal's case takes on a new meaning. What is the cost of prosecution for its own sake--and what happens when there is a code of silence and few checks and balances on those who are sworn to uphold the law?

More Information Than You Require

Winner of the 2019 NAACP Image Award for Outstanding Literary Work in Poetry Finalist for the 2019 Los Angeles Times Book Prize in Poetry A searing volume by a poet whose work conveys "the visceral effect that prison has on identity" (Michiko Kakutani, New York Times). Felon tells the story of the effects of incarceration in fierce, dazzling poems—canvassing a wide range of emotions and experiences through homelessness, underemployment, love, drug abuse, domestic violence, fatherhood, and grace—and, in doing so, creates a travelogue for an imagined life. Reginald Dwayne Betts confronts the funk of postincarceration existence and examines prison not as a static space, but as a force that enacts pressure throughout a person ' s life. The poems move between traditional and newfound forms with power and agility—from revolutionary found poems created by redacting court documents to the astonishing crown of sonnets that serves as the volume ' s radiant conclusion. Drawing inspiration from lawsuits filed on behalf of the incarcerated, the redaction poems focus on the ways we exploit and erase the poor and imprisoned from public consciousness. Traditionally, redaction erases what is top secret; in Felon, Betts redacts what is superfluous, bringing into focus the profound failures of the criminal justice system and the inadequacy of the labels it generates. Challenging the complexities of language, Betts animates what it means to be a "felon."

"Two powerful phenomena are simultaneously unfolding on Earth: the rise of the climate movement and the rise of women and girls. The People's Climate March and the Women's March. School strikes for climate and the #MeToo movement. Rebellions against extinction and declarations that time's up. More than concurrent, the two trends are deeply connected. From sinking islands to drought-ridden savannas, the global warming crisis places an outsized burden on women, largely because of gender inequalities. In many parts of the world, women hold traditional roles as the primary caregivers in families and communities, and as the main providers of food and fuel, they are more vulnerable when flooding and drought occur; the U.N. estimates 80% of those who have been displaced by climate change are women. A Radical New Model for Unleashing Your Company's Potential In most organizations nearly everyone is doing a second job no one is paying them for—namely, covering their weaknesses, trying to look their best, and managing other people's impressions of them. There may be no greater waste of a company's resources. The ultimate cost: neither the organization nor its people are able to realize their full potential. What if a company did everything in its power to create a culture in which everyone—not just select “high potentials”—could overcome their own internal barriers to change and use errors and vulnerabilities as prime opportunities for personal and company growth? Robert Kegan and Lisa Lahey (and their collaborators) have found and studied such companies—Deliberately Developmental Organizations. A DDO is organized around the simple but radical conviction that organizations will best prosper when they are more deeply aligned with people's strongest motive, which is to grow. This means going beyond consigning “people development” to high-potential programs, executive coaching, or once-a-year off-sites. It means fashioning an organizational culture in which support of people's development is woven into the daily fabric of working life and the company's regular operations, daily routines, and conversations. An Everyone Culture dives deep into the worlds of three leading companies that embody this breakthrough approach. It reveals the design principles, concrete practices, and underlying science at the heart of DDOs—from their disciplined approach to giving feedback, to how they use meetings, to the distinctive way that managers and leaders define their roles. The authors then show readers how to build this developmental culture in their own organizations. This book demonstrates a whole new way of being at work. It suggests that the culture you create is your strategy—and that the key to success is developing everyone.

And so he returned to exactly where he had left off—namely, page 256 of the paperback edition of *The Areas of My Expertise*. And he brought with him: **MORE INFORMATION THAN YOU REQUIRE**. Which, naturally, begins on page 257. Like its predecessor, *More Information Than You Require* consists of brief articles, overlong lists, frighteningly complex charts, and beguiling narratives on new and familiar themes such as: **THE PAST** (because there is always more of it) **THE FUTURE** (because they say there is still some left) **MOLE-MEN** (including a list of 700 Mole-man names) **GAMBLING**, **THE SPORT OF THE ATHSMATIC MAN** (including hermit crab racing) **CRYPTOGEOGRAPHY** (including Canada) **HOW TO BE A FAMOUS MINOR TELEVISION PERSONALITY** (Hint: Go on television) **AND NOW**, the relatively pocket-sized and inexpensive paperback edition includes even more. **MORE INFORMATION THAN YOU REQUIRE**, updated to include the very latest in implausibility. **PLUS!**: This paperback edition includes a special self-expanding fold-out edition of **THE TAXONOMY OF COMPLETE WORLD KNOWLEDGE**, which you have probably never seen before because it has been carefully hidden. **UNTIL NOW**. Look out for John Hodgman's latest book, *Vacationland*, available from Viking in Fall 2017.

The Adventure Zone: Murder on the Rockport Limited!

"Bob Chapman, CEO of the \$1.7 billion manufacturing company Barry-Wehmiller, is on a mission to change the way businesses treat their employees." - Inc. Magazine Starting in 1997, Bob Chapman and Barry-Wehmiller have pioneered a dramatically different approach to leadership that creates off-the-charts morale, loyalty, creativity, and business performance. The company utterly rejects the idea that employees are simply functions, to be moved around, "managed" with carrots and sticks, or discarded at will. Instead, Barry-Wehmiller manifests the reality that every single person matters, just like in a family. That's not a cliché on a mission statement; it's the bedrock of the company's success. During tough times a family pulls together, makes sacrifices together, and endures short-term pain together. If a parent loses his or her job, a family doesn't lay off one of the kids. That's the approach Barry-Wehmiller took when the Great Recession caused revenue to plunge for more than a year. Instead of mass layoffs, they found creative and caring ways to cut costs, such as asking team members to take a month of unpaid leave. As a result, Barry-Wehmiller emerged from the downturn with higher employee morale than ever before. It's natural to be skeptical when you first hear about this approach. Every time Barry-Wehmiller acquires a company that relied on traditional management practices, the new team members are skeptical too. But they soon learn what it's like to work at an exceptional workplace where the goal is for everyone to feel trusted and cared for--and where it's expected that they will justify that trust by caring for each other and putting the common good first. Chapman and coauthor Raj Sisodia show how any organization can reject the traumatic consequences of rolling layoffs, dehumanizing rules, and hypercompetitive cultures. Once you stop treating people like functions or costs, disengaged workers begin to share their gifts and talents toward a shared future. Uninspired workers stop feeling that their jobs have no meaning. Frustrated workers stop taking their bad days out on their spouses and kids. And everyone stops counting the minutes until it's time to go home. This book chronicles Chapman's journey to find his true calling, going behind the scenes as his team tackles real-world challenges with caring, empathy, and inspiration. It also provides clear steps to transform your own workplace, whether you lead

two people or two hundred thousand. While the Barry-Wehmiller way isn't easy, it is simple. As the authors put it: "Everyone wants to do better. Trust them. Leaders are everywhere. Find them. People achieve good things, big and small, every day. Celebrate them. Some people wish things were different. Listen to them. Everybody matters. Show them."

Adnan's Story

The nineteenth-century history of the Church of Jesus Christ of Latter-day Saints, Max Perry Mueller argues, illuminates the role that religion played in forming the notion of three "original" American races—red, black, and white—for Mormons and others in the early American Republic. Recovering the voices of a handful of black and Native American Mormons who resolutely wrote themselves into the Mormon archive, Mueller threads together historical experience and Mormon scriptural interpretations. He finds that the Book of Mormon is key to understanding how early followers reflected but also departed from antebellum conceptions of race as biblically and biologically predetermined. Mormon theology and policy both challenged and reaffirmed the essentialist nature of the racialized American experience. The Book of Mormon presented its believers with a radical worldview, proclaiming that all schisms within the human family were anathematic to God's design. That said, church founders were not racial egalitarians. They promoted whiteness as an aspirational racial identity that nonwhites could achieve through conversion to Mormonism. Mueller also shows how, on a broader level, scripture and history may become mutually constituted. For the Mormons, that process shaped a religious movement in perpetual tension between its racist and universalist impulses during an era before the concept of race was secularized.

How I Built This

An unconventional book of wisdom and life advice from renowned business school professor and New York Times bestselling author of *The Four* Scott Galloway. Scott Galloway teaches brand strategy at NYU's Stern School of Business, but his most popular lectures deal with life strategy, not business. In the classroom, on his blog, and in YouTube videos garnering millions of views, he regularly offers hard-hitting answers to the big questions: What's the formula for a life well lived? How can you have a meaningful career, not just a lucrative one? Is work/life balance possible? What are the elements of a successful relationship? *The Algebra of Happiness: Notes on the Pursuit of Success, Love, and Meaning* draws on Professor Galloway's mix of anecdotes and no-BS insight to share hard-won wisdom about life's challenges, along with poignant personal stories. Whether it's advice on if you should drop out of school to be an entrepreneur (it might have worked for Steve Jobs, but you're probably not Steve Jobs), ideas on how to position yourself in a crowded job market (do something "boring" and move to a city; passion is for people who are already rich), discovering what the most important decision in your life is (it's not your job, your car, OR your zip code), or arguing that our relationships to others are ultimately all that matter, Galloway entertains, inspires, and provokes. Brash, funny, and surprisingly moving, *The Algebra of Happiness* represents a refreshing perspective on our need for both professional success and personal fulfillment, and makes the perfect gift for any new graduate, or for anyone who feels adrift.

The Algebra of Happiness

"Regardless of how much money you have, your race, where you live, what religion you follow, you are going through something. Or you already have or you will. As momma always said, "Everybody's got something." So begins beloved Good Morning America anchor Robin Roberts's new memoir in which she recounts the incredible journey that's been her life so far, and the lessons she's learned along the way. With grace, heart, and humor, she writes about overcoming breast cancer only to learn five years later that she will need a bone marrow transplant to combat a rare blood disorder, the grief and heartbreak she suffered when her mother passed away, her triumphant return to GMA after her medical leave, and the tremendous support and love of her family and friends that saw her through her difficult times. Following her mother's advice to "make your mess your message," Robin taught a nation of viewers that while it is true that we've all got something -- a medical crisis to face, aging parents to care for, heartbreak in all its many forms --- we've also all got something to give: hope, encouragement, a life-saving transplant or a spirit-saving embrace. As Robin has learned, and what readers of her remarkable story will come to believe as well, it's all about faith, family and friends. And finding out that you are stronger, much stronger, than you think.

collection. You will never look at your bookshelves the same way again. For the Love of Books is about storytelling beyond the pages of our favorite books. Our books—the ones we choose to keep—tell the story of who we are. They remind us who we once were and who we aspire to be. Thatcher Wine founded Juniper Books in 2001. The company creates custom libraries and has perfected the art of turning books inside out to allow for books to tell stories not just to us, but about us. Working with booklovers, homeowners, and designers, Juniper Books has provided the world with a fresh new approach to the printed book. Thatcher grew up in New York City where his parents owned and operated The Quilted Giraffe, one of the most innovative restaurants in America. Thatcher graduated from Dartmouth College with a degree in history and art history and lives in Boulder, Colorado. Elizabeth Lane is the founder of Quarterlane, a quarterly subscription book service which merged with Juniper Books in 2018. She is also the book buyer for her local independent bookstore, Partners Village Store and Kitchen in Westport, Massachusetts. Prior to working in books, Elizabeth worked in contemporary visual art—in galleries, nonprofit initiatives and museums in New York, Austin, and Chicago. The Spiritual Practice of Remembering

Tamara Ghandour, author, podcaster, keynote speaker and founder of innovation training company, LaunchStreet, used to believe that innovation was the domain of a select few, exclusive to certain industries, or relegated to a specific job role. But, as Tamara discovered in her 25 years of work and research, everybody has the capacity to innovate. It's a person's unique innovation style, (which can be assessed and channelled), that can transform inertia into innovation. Drawing on eye-opening data from her proprietary Innovation Quotient Edge Assessment, Innovation is Everybody's Business is for those looking for solutions to the daily pain of "how do I prove my worth," a reality for many people whether they work in the C-Suite or on the front-lines. This book will resonate with those that recognize that being more innovative is their ticket to being indispensable. It is also for leaders under pressure to build a culture of innovation but don't know how. As organizations face pressure to innovate, the accountability for making it happen falls on senior and mid-level leaders. They are told what to do, but not how to do it. This book will give them a tool to build a team of innovators who make an impact every day in big and small ways.

it. The most important thing we have learned as a result of the education reform movement is that student achievement stands or falls on the motivation and skills of teachers. We must ensure that all teachers are capable of delivering a standards based curriculum that describes what students should know and be able to do, and that these standards are delivered by means of a rich and engaging "pedagogy of plenty." By these two acts we can ensure that all schools will be ready and able to educate everybody's children.
