First Little Comics Guided Reading Levels C & D

Alpha-Phonics: IT IS THE PERFECT READING INSTRUCTION PROGRAM TO USE DURING THE VIRUS CRISIS. IT WORKS FAST, IS VERY SIMPLE. SURE RESULTS! THIS ONE BOOK IS COMPLETE. NOTHING ELSE NEEDED. HE/SHE CAN BE READING SIMPLE SENTENCES EVEN ON DAY ONE!! Used by tens of thousands for 37 years. Alpha-Phonics is probably the simplest, most effective, REASONABLY priced phonics instruction programs available. HERE IS WHY IT WORKS SO WELL: IT IS SIMPLE!! (Please also scroll down to see the VIDEO near the bottom left of this page) HERE IS WHY: There are only 44 phonograms (Sounds) the child needs to learn in order to read. Reading, contrary to what you have been told, is easy to teach because all you need to do is teach the student to SOUND OUT the words they want to read. At first, they sound the words out aloud, later they do it in their head silently. That is ALL there is to teaching reading. MOM get this: All 128 Lessons in Alpha-Phonics are covered in ONLY 14 pages of instructions for you. Students begin with short vowels putting together simple words (Like a with m = am or a with s = as) and progress to the more advanced words. With Alpha-Phonics the beginner can be reading simple sentences by lesson three, and that can even be on the first day! Other reading instruction programs try to do too much. They inject grammar, pictures and other material, needlessly complicating the task. Alpha-Phonics just teaches reading only. Alpha-Phonics has as a BONUS: you teach SPELLING easily as you go (through simple dictation). Alpha-Phonics easily introduces over 3,500 words in its simple 128 lessons. Some students can learn to read in only months or less. Alpha-Phonics also works very well for older students, even grown adults who need remediation. Is there a negative about Alpha-Phonics? Yes. In the past 37 years we have heard only one criticism (Only a few times). It is: Some Moms say they think their child can become bored when taught by Alpha-Phonics. Why? Parents have been convinced that learning has to be fun time. They have been led to believe games, card decks, cartoons/pictures, spin the needle tricks, etc., make it fun. They feel they have to entertain their kids while teaching. But this unnecessarily slows down the process. With Alpha-Phonics the student can actually be READING simple sentences even day ONE! Students do see lists of words in Alpha-Phonics lessons, but they QUICKLY are actually READING those words; they are accomplishing, instead of being entertained. The Bells and Whistles in other programs slow the process and cost time and money \$\$\$. The huge sense of success in actually reading quickly overcomes any other consideration. We almost forgot the SUPER BONUS: Many ADULTS become BETTER readers while teaching their child! The lessons for the Student are in LARGE TYPE on 8 1/2 X11 pages meaning you can instruct him/her DIRECTLY from the book. Nothing need be copied on separate paper. Makes everything much easier than if it were on 5 X 8 pages. Alpha-Phonics is highly recommended by leading Homeschooling curriculum reviewers such as Mary Pride, Cathy Duffy, Karen Andreola. Amazon also has a set of practice Readers and a practice Phonics Workbook to

They are specifically designed to follow along with the Alpha-Phonics book as you teach from it. The study of mental imagery has been a central concern of modern psychology, but most of what we know concerns visual imagery. A number of researchers, however, have recently begun to explore auditory imagery; this foundation-level volume presents their work. The topics covered are diverse, a reflection of the fact that auditory imagery seems relevant to numerous research domains -- from the ordinary memory rehearsal of undergraduates to the delusional voices of schizophrenics, from music imagery to imagery for speech. The chapters also address the parallels (and contrasts) between visual and auditory imagery, the relations between "inner speech" and overt speech, and between the "inner ear" and actual hearing. This book provides a valuable resource for students in many areas: imagery, working memory, music, speech, auditory perception, schizophrenia, or deafness.
