In 1967, UG underwent a series of biological mutations that left him in the 'natural state' - functioning without the interference of thought. With no fixed address, no followers and no organization, UG spent the next thirty years travelling the world with an uncompromising message: that 'mind is a myth' and the human condition should be demystified and de-psychologized and viewed in purely physiological terms. Candid and clear-eyed, this is a profoundly thought-provoking biography of one of the most radical philosophers of our age.
