So when she’s given the opportunity to join a shadowy task force aimed at undermining Thomas Sankara, the

Yes, even though she secretly admires the work Sankara is doing for his country. Yes, even though she is still grieving the mysterious death of her sister, whose example led Marie to this career path in the first place. Yes, even though a furious part of her suspects she's being offered the job because of her appearance and not her talent. In the year that follows, Marie will observe Sankara, seduce him, and ultimately have a hand in the coup that will bring him down. Shortlisted for the 2017 Louise de Kiriline Award for Nonfiction The age of exploration is not over. When Adam Shoalts ventured into the largest unexplored wilderness on the planet, he hoped to set foot where no one had ever gone before. What he discovered surprised even him. Shoalts was no stranger to the wilderness. He had hacked his way through jungles and swamp, had stared down polar bears and climbed mountains. But one spot on the map called out to him irresistibly: the Hudson Bay Lowlands, a trackless expanse of muskeg and lonely rivers, caribou and wolf—an Amazon of the north, parts of which to this day remain unexplored. Cutting through this forbidding landscape is a river no explorer, trapper, or canoeist had left any record of paddling. It was this river that Shoalts was obsessively determined to explore. It took him several attempts, and years of research. But finally, alone, he found the headwaters of the mysterious river. He believed he had discovered what he had set out to find. But the adventure had just begun. Unexpected dangers awaited him downstream. Gripping and often poetic, *Alone Against the North* is a classic adventure story of single-minded obsession, physical hardship, and the restless sense of wonder that every explorer has in common. But what does exploration mean in an age when satellite imagery of even the remotest corner of the planet is available to anyone with a phone? Is there anything left

to explore? What Shoalts discovered as he paddled downriver was a series of unmapped waterfalls that could easily have killed him. Just as astonishing was the media reaction when he got back to civilization. He was crowned "Canada's Indiana Jones" and appeared on morning television. He was feted by the Royal Canadian Geographical Society and congratulated by the Governor General. People were enthralled by Shoalts's proof that the world is bigger than we think. Shoalts's story makes it clear that the world can become known only by getting out of our cars and armchairs, and setting out into the unknown, where every step is different from the one before, and something you may never have imagined lies around the next curve in the river.

At once far flung and intimate, a fascinating look at how finding our way make us human. In

this compelling narrative, O'Connor seeks out neuroscientists, anthropologists and master navigators to understand how navigation ultimately gave us our humanity. Biologists have been trying to solve the mystery of how organisms have the ability to migrate and orient with such precision—especially since our own adventurous ancestors spread across the world without maps or instruments.

O'Connor goes to the Arctic, the Australian bush and the South Pacific to talk to masters of their environment who seek to preserve their traditions at a time when anyone can use a GPS to navigate. O'Connor explores the neurological basis of spatial orientation within the hippocampus. Without it, people inhabit a dream state, becoming amnesiacs incapable of finding their way, recalling the past, or imagining the future. Studies have shown that the more we exercise our cognitive mapping skills, the greater the grey matter and health of our hippocampus. O'Connor talks to scientists studying how atrophy in the hippocampus is associated with afflictions such as impaired memory, dementia, Alzheimer's Disease, depression and PTSD.

Wayfinding is a captivating book that charts how our species' profound capacity for exploration, memory and storytelling results in topophilia, the love of place. "O'Connor talked to just the right people in just the right places, and her narrative is a marvel of storytelling on its own merits, erudite but lightly worn. There are many reasons why

NATIONAL BESTSELLER "A brave and marvelous book. A page-turner that will rip your heart out." –Jon Krakauer "Gripping." –New York Times Book Review (Editor's Choice) \* "Beautiful." –Washington Post \* "Destined to become an adventure classic." –Anchorage Daily News In the tradition of Into the Wild comes an instant classic of outdoor literature, a riveting work of uncommon depth: The Adventurer's Son is Roman Dial's extraordinary account of his two-year quest to unravel the mystery of his son's disappearance in the jungles of Costa Rica. In the predawn hours of July 10, 2014, the twenty-seven-year-old son of preeminent Alaskan scientist and National Geographic Explorer Roman Dial, walked alone into Corcovado National Park, an untracked rainforest along Costa Rica's remote Pacific Coast that shelters miners, poachers, and drug smugglers. He carried a light backpack and machete. Before he left, Cody Roman Dial emailed his father: "I am not sure how long it will take me, but I'm planning on doing 4 days in the jungle and a day to walk out.

I'll be bounded by a trail to the west and the coast everywhere else, so it should be difficult to get lost forever." They were the last words Dial received from his son. As soon as he realized Cody Roman's return date had passed, Dial set off for Costa Rica. As he trekked through the dense jungle, interviewing locals and searching for clues—the authorities suspected murder—the desperate father was forced to confront the deepest questions about himself and his own role in the events. Roman had raised his son to be fearless, to be at home in earth's wildest places, travelling together through rugged Alaska to remote Borneo and Bhutan. Was he responsible for his son's fate? Or, as he hoped, was Cody Roman safe and using his wilderness skills on a solo adventure from which he would emerge at any moment? Part detective story set in the most beautiful yet dangerous reaches of the planet, *The Adventurer's Son* emerges as a far deeper tale of discovery—a journey to understand the truth about those we love the most. *The Adventurer's Son* includes fifty black-and-white photographs.

we're about to lose really is" (Bill McKibben) With a new epilogue by the author After nearly a decade overseas as a war reporter, the acclaimed journalist Dahr Jamail returned to America to renew his passion for mountaineering, only to find that the slopes he had once climbed have been irrevocably changed by climate disruption. In response, Jamail embarks on a journey to the geographical front lines of this crisis—from Alaska to Australia's Great Barrier Reef, via the Amazon rainforest—in order to discover the consequences to nature and to humans of the loss of ice. In *The End of Ice*, we follow Jamail as he scales Denali, the highest peak in North America, dives in the warm crystal waters of the Pacific only to find ghostly coral reefs, and explores the tundra of St. Paul Island where he meets the last subsistence seal hunters of the Bering Sea and witnesses its melting glaciers. Accompanied by climate scientists and people whose families have fished, farmed, and lived in the areas he visits for centuries, Jamail begins to accept the fact that Earth, most likely, is in a hospice situation. Ironically, this allows him to renew his passion for the planet's wild places, cherishing Earth in a way he has never been able to before. Like no other book, *The End of Ice* offers a firsthand chronicle—including photographs throughout of Jamail on his journey across the world—of the catastrophic reality of our situation and the incalculable

## **Lives and Deaths**

A “well-written, engaging detective story” (Kirkus Reviews, starred review) about a rogue who trades in rare birds and their eggs—and the wildlife detective determined to stop him. On May 3, 2010, an Irish national named Jeffrey Lendrum was apprehended at Britain’s Birmingham International Airport with a suspicious parcel strapped to his stomach. Inside were fourteen rare peregrine falcon eggs snatched from a remote cliffside in Wales. So begins a “vivid tale of obsession and international derring-do” (Publishers Weekly), following the parallel lives of a globe-trotting smuggler who spent two decades capturing endangered raptors worth millions of dollars as race champions—and Detective Andy McWilliam of the United Kingdom’s National Wildlife Crime Unit, who’s hell bent on protecting the world’s birds of prey. “Masterfully constructed” (The New York Times) and “entertaining and illuminating” (The Washington Post), *The Falcon Thief* will whisk you away from the volcanoes of Patagonia to Zimbabwe’s Matobo National Park, and from the frigid tundra near the Arctic Circle to luxurious aviaries in the deserts of Dubai, all in pursuit of a man who is reckless,

arrogant, and gripped by a destructive compulsion to make the most beautiful creatures in nature his own. It's a story that's part true-crime narrative, part epic adventure—and wholly unputdownable until the very last page.

### **The Tiger's Apprentice**

For fans of Cheryl Strayed, the gripping story of a biologist's human-powered journey from the Pacific Northwest to the Arctic to rediscover her love of birds, nature, and adventure. During graduate school, as she conducted experiments on the peculiarly misshapen beaks of chickadees, ornithologist Caroline Van Hemert began to feel stifled in the isolated, sterile environment of the lab. Worried that she was losing her passion for the scientific research she once loved, she was compelled to experience wildness again, to be guided by the sounds of birds and to follow the trails of animals. In March of 2012, she and her husband set off on a 4,000-mile wilderness journey from the Pacific rainforest to the Alaskan Arctic, traveling by rowboat, ski, foot, raft, and canoe. Together, they survived harrowing dangers while also experiencing incredible moments of joy and grace -- migrating birds silhouetted against the moon, the steamy breath of caribou, and the bond that comes from sharing such experiences. A unique blend
