Out on Business

Raising livestock, such as cattle, used to be a common practice among homesteaders and early settlers. These people used cattle for many of the same things we do today; for food, milk, and to tan leather for clothes and other goods. They also used cattle as draft animals when horses were scarce; to pull carts, farm equipment, and wagons full of products. Currently, most cattle farmers operate an institution of the industrial food chain, rather than butchering their livestock for self-sustenance. Should a survival

I read an article in 2012 about a mother who was trying to care for her special needs child and become so frustrated and overwhelmed that she killed her. If she would have had the assistance of federal and state programs to help her as well as an experienced person to give her advice this might not have happened. This gave me the motivation to finish my books so those families struggling to raise these demanding and difficult children will know there are resources and help available that can relieve the stress of everyday living. My heart goes out to all parents who face this tremendous responsibility. You parents are the heroes of today. You trod down a path unknown to you and through tears, disappointments and heartbreaks we tread forward trying to find answers and help. This is 1 of a 3 book set. The second is “Learning from an Angel” which shares the life and hardships of our family as Missy grows up and third “Missy's Medical History” spanning 24 ½ years. An instant New York Times bestseller, Dan Lyons' "hysterical" (*Recode*) memoir, hailed by the Los Angeles Times as "the best book about Silicon Valley," takes readers inside the maddening world of fad-chasing venture capitalists, sales bros, social climbers, and sociopaths at today's tech startups. For twenty-five years Dan Lyons was a magazine writer at the top of his profession--until one Friday morning when he received a phone call: Poof. His job no longer existed. "I think they just want to hire younger people," his boss at Newsweek told him. Fifty years old and with a wife and two young kids, Dan was, in a word, screwed. Then an idea hit. Dan had long reported on Silicon Valley and the tech explosion. Why not join it? HubSpot, a Boston start-up, was flush with \$100 million in venture capital.

They offered Dan a pile of stock options for the vague role of "marketing fellow." What could go wrong? HubSpotters were true believers: They were making the world a better place by selling email spam. The office vibe was frat house meets cult compound: The party began at four thirty on Friday and lasted well into the night; "shower pods" became hook-up dens; a push-up club met at noon in the lobby, while nearby, in the "content factory," Nerf gun fights raged. Groups went on "walking meetings," and Dan's absentee boss sent cryptic emails about employees who had "graduated" (read: been fired). In the middle of all this was Dan, exactly twice the age of the average HubSpot employee, and literally old enough to be the father of most of his co-workers, sitting at his desk on his bouncy-ball "chair."

Barrie tackled many subjects over the course of his career, often grappling with philosophical and psychological topics. The breadth of his intellect is on full display in Courage, which is the text of a stirring and inspirational speech he delivered to a group of graduating college students in the early 1920s.

ways. Like many women of her generation, writer Heather Lanier did everything by the book when she was expecting her first child. She ate organic foods, recited affirmations and drew up a birth plan for an unmedicated labour in the hopes that she could create a SuperBaby, an ultra-healthy human destined for a high-achieving future. But her daughter Fiona challenged all of Lanier's preconceptions. Born with an ultra-rare syndrome known as Wolf-Hirschhorn, Fiona received a daunting prognosis: she would experience significant developmental delays and might not reach her second birthday. Not only had Lanier failed to produce a SuperBaby, she now fiercely loved a child that the world would sometimes reject. The diagnosis obliterated Lanier's perfectionist tendencies, along with her most closely held beliefs about certainty, vulnerability and love. With tiny bits of mozzarella cheese, a walker rolled to library story time, a talking iPad app and a whole lot of rock and reggae, mother and daughter spend their days doing whatever it takes to give Fiona nourishment, movement, and language. They also confront society's attitudes toward disability and the often cruel assumptions made about Fiona's worth. Lanier realises the biggest question is not, Will my daughter walk or talk? but, How can I best love my girl, just as she is? Loving Fiona opens Lanier up to new understandings of what it means to be human, what it takes to be a mother, and above all, the aching joy and wonder that come from embracing the unique life of her rare girl.

"Devorah Blachor, an ardent feminist, never expected to be the parent of a little girl who was totally obsessed with the color pink, princesses, and all things girly. She wasn't sure how to reconcile the difference between her parental expectations and the reality of her Disney-worshiping three-year-old daughter. Offering insight, advice, and plenty of humor and personal anecdotes, this mother shares her story of how she surrendered control and opened up--to her Princess Toddler, to pink, and to life. She addresses important issues such as how to raise a daughter in a society that pressures girls and women to conform to an unrealistic beauty ideal, and how to let her daughter feel free to be her authentic self"--
