Until Today!

Why you should be reading this book. To the victims of crime: Make no mistake about it, after reading this book, you will know beyond a reasonable doubt that prisoners in jail are suffering. Whether it is on the city, county, or state level, prisoners are living in a world that far extends the suffering they have inflicted upon you. Having this knowledge will never make up for your loss or ill feelings. It can only do two things: give you peace of mind or allow you to forgive. In any case, each and every day a criminal is behind bars, s/he is subject to disease, destruction, despair, and death. This book will provide you with extremely vivid details of the life of a prisoner. And I can assure you, what's going on in the mind of a prisoner is far more torturous than what's happening in the cell. To the parents: What will it be today that sets you apart from the responsibility of being accountable to your children. How will you spend your day? What puts you at risk of coming to jail today? Consider the events that make up your day; the drives, the pick ups, the drops, the fighting, the stealing, the dealing, the doping, the drinking. How much longer can you play this game of roulette with your children? What's it going to take for you to already realize the sorrow, regret, and despair, you will feel by coming to jail and simultaneously abandoning your children. To the criminal: Are you alone? Did you come to jail today? Will you be here tomorrow? Does your history wish for a better re-occurrence of events unfolding in your life? Right now, at this very moment, are you in jail because of some unforeseen future that should have been recognized long before the cuffs were placed around your wrists? If you are in jail today, have been in jail before, or are setting yourself up to go to jail, this is the book to read. Jail is the sentence you receive for committing a crime. The sentence will be time. But the true punishment of your crime will come from the imprisonment of your mind. Peter Hall

The infrastructural development of the capital intensive telecom sector would require a large number of people. These people would be managers, who need not necessarily be telecom engineers. In fact a large number of them would be from very diverse academic backgrounds, They will have to manage the technology and eventually act as a conduit for the technology to reach the end user. They ought to know more about the management and applications of technology rather than the technology itself. Traditionally telecom is a hi-tech subject. Telecom engineers have to study the subject from the technical and mathematical perspectives. This book is for those, who would like to know all about telecommunications, without delving into detailed technical treatment of the subject. At the same time it will be a satisfying update for telecom engineers and professionals. Most books on telecommunications have a large technical content. This book deals with concepts which are essential for handling day to day affairs by a large number of decision makers. The technical depth is more than adequate. Its strength lies in the simplicity of approach and presentation, a non-mathematical treatment of the subject and above all a very wide coverage. The global telecom infrastructure has been presented as a 'seamless system,' one component leading to the other. The structure of the book flows out of this concept. We have strived to present both analog and digital communications, techniques and their applications in a straight forward manner. More than four hundred diagrams and a number of product photographs have been used as illustrations. Where relevant, live networks and systems from the Indian context have been used as examples for easy understanding. Clear shift from voice to data and now more recently towards picture and video transmission has been emphasised and has been the overall theme while structuring the entire book as well as each chapter.

This is the author's belief: By preparing this book it'll be of great help to all its readers. He has anticipated his works will open doors that are closed to many people. He wants to put light where there is darkness. Most of all, his desires are to let people know this: God is our heavenly Father, the one who has great love for all living human being. This author knows that some people don't stop to think too much of God's goodness, then they can't see that God is the only true provider for every man/woman, who is upon this earth. All the same, God is! Owing to that, our duties are to fear and obey the Lord. That we can only do, by following Him to wherever He leads. We have to learn to put trust in His words. We have to learn to stand on His every promise. It's for our own good. This author however, is of the realization that there is a fair number of people who do not know what God's guide for us really is. Now all that, bothers this author, it is really troubling him very much, so much so, He decides to put it in writing. Then he says this: The only thing that can lead people to God - is by following the Lord's written words. If people truly grasp that, they will esteem God more. Hence, once God is being glorified, and He is pleased, it could enable Him to bless the entire world in a more abundant way. Again, this says the author: Despite the best of one's intention, it's hard to fix the entire world all by one's self. Yet he believes that many people, can do something to make it better. That's why - he tries to write part of what he has to offer in books. He sees it as his way of evangelizing - to help save souls that would be lost. Not just that, but his books are organized to comfort every one, especially those who are sad and lonely.
