The Mysterious Island

CAPTAIN NEMO -- MADMAN OR SAVIOR? A mysterious sea monster has been attacking ships. Professor Pierre Aronnax, the renowned French marine biologist, has been summoned. Its a giant narwhal, we think, Professor, says the United States Government -- a deadly kind of whale. Aronnax summons master harpoonist Ned Land -- and his assistant, Conseil -- to join the expedition to stop this threat. Aboard the ship Abraham Lincoln they track the beast. The Professor and his team are thrown overboard -- and captured by the most famously tormented captain of all time, and his astonishing underwater vessel: Captain Nemo and the Nautilus These indelible names echo down the corridors of science fiction, and will forever. Experience the thrill of underwater mysteries The strange world of sunken Atlantis The famous giant squid And finally, the unforgettable fate of Captain and ship in the Maelstrom. Here in this nineteenth-century translation from the French is one of the greatest fantastic novels of all time, with all its period flavor.

Twenty Thousand Leagues Under the Seas

Captain Nemo Trilogy
In Search of the Castaways, Twenty Thousand Leagues Under the Sea, The Mysterious Island, In Search of the Castaways
Is a novel by the French writer Jules Verne, published in 1867-1868. The original edition, published by Hetzel, contains a number of illustrations by Édouard Riou. In 1876 it was republished by George Routledge & Sons as a three volume set titled "A Voyage Round The World". The three volumes were subtitled "South America", "Australia", and "New Zealand". (As often with Verne, English translations have appeared under different names; another edition has the overall title "Captain Grant's Children" and has two volumes subtitled "The Mysterious Document" and "Among the Cannibals".)
Twenty Thousand Leagues Under the Sea, The novel was originally serialized from March 1869 through June 1870 in Pierre-Jules Hetzel's periodical, the Magasin d'Éducation et de Récréation. The deluxe illustrated edition, published by Hetzel in November 1871, included 111 illustrations by Alphonse de Neuville and Édouard Riou. The book was highly acclaimed when released and still is now; it is regarded as one of the premiere adventure novels and one of Verne's greatest works, along with Around the World in Eighty Days and Journey to the Center of the Earth. The description of Nemo's ship, called the Nautilus, was considered ahead of its time, as it accurately describes features on submarines, which at the time were very

primitive vessels. Thus, the book has been able to age well because of its scientific theories, unlike some of Verne's other works, like *Journey to the Center of the Earth*, which are not scientifically accurate and serve more simply as adventure novels. *The Mysterious Island* (French: *L'Île mystérieuse*) is a novel by Jules Verne, published in 1874. The original edition, published by Hetzel, contains a number of illustrations by Jules Fé rat. The novel is a crossover sequel to Verne's famous *Twenty Thousand Leagues Under the Sea* and *In Search of the Castaways*, though its themes are vastly different from those books. An early draft of the novel, initially rejected by Verne's publisher and wholly reconceived before publication, was titled *Shipwrecked Family: Marooned With Uncle Robinson*, seen as indicating the influence on the novel of *Robinson Crusoe* and *The Swiss Family Robinson*. Verne developed a similar theme in his later novel, *Godfrey Morgan* (French: *L'École des Robinsons*, 1882)

Jules Verne's Twenty-Thousand Leagues Under the Sea

This is Jules Verne's classic tale of undersea adventure, based on the 1873 translation by Lewis Mercier. Since that's been the standard English translation for over a hundred years, it's probably the one you remember reading way back when, and the edition you'll be familiar with. Re-reading this as an adult, and an adult who's spent twenty-plus years since then reading science fiction, I did have to remind myself more than once how amazing the then-future technologies Verne describes, like electric rifles, undersea diving suits, electric motors, etc., would have been to his contemporary readers; the book was first published in 1869, a mere five years after the Confederate submarine Hunley became the first submarine to sink an enemy warship (and sank itself in the process). At times I found myself mentally substituting 'outer space' for 'under sea,' just to help me analogize the situation. Despite that, the plot and action were as riveting now as they were when I first read it. Professor Arronax, his valet Conseil, and harpooner Ned Land are coaxed into assisting the United States in a search for a sea monster said to be terrorizing shipping lanes--but the monster is not flesh and blood. The three soon find themselves in the hands of the mysterious Captain Nemo, who has created a machine that glides beneath the surface of the ocean: a submarine named Nautilus. LEAGUES is a fascinating novel to read--fascinating as much for itself as for what it tells us about the world of the 1870s and what was believed to be possible. The vision that Verne had would indeed come to pass: there would be submarines, and they would strong enough to brave the polar seas. It is an impressive accomplishment--and a tremendously fun read.

Twenty Thousand Leagues Under the Sea

Twenty Thousand (20,000) Leagues Under the Sea (French: *Vingt mille lieues sous les mers*) is a classic science fiction novel by French writer Jules Verne published in 1870. It tells the story of Captain Nemo and his submarine *Nautilus* as seen from the perspective of Professor Pierre Aronnax. As the story begins in 1866, a mysterious sea monster, theorized by some to be a giant narwhal, is sighted by ships of several nations; an ocean liner is also damaged by the creature. The United States government finally assembles an expedition in New York City to track down and destroy the menace. Professor Pierre Aronnax, a noted French marine biologist and narrator of the story, who happens to be in New York at the time and is a recognized expert in his field, is issued a last-minute invitation to join the expedition, and he accepts. This ebook edition contains all 70 original illustrations by Alphonse de Neuville and Édouard Riou.

Twenty Thousand Leagues Under The Sea "The New Annotated Classic Edition"

French novelist Jules Verne - "the man who invented the future" - captured and intensified the human impulse to explore the world's hidden regions. This prophetic 1870 adventure novel, centering on a fabulous underwater craft commanded by the brilliant and mysterious Captain Nemo, was written well before the development of the deep-water submarine. Combining marvelous scientific achievements with common, everyday events, the story brims with intricate descriptions of a futuristic vessel and bizarre scenes of life on the ocean's bottom. Sights include Red Sea coral, wreckage from a historic naval battle, Antarctic ice shelves, and the mythical city of Atlantis. Rousing adventures range from a confrontation with a giant squid to an encounter with belligerent cannibals. The crowning achievement of Verne's literary career, *Twenty Thousand Leagues Under the Sea* influenced H. G. Wells and generations of writers, inspired numerous films, and continues to captivate readers of all ages.

Twenty Thousand Leagues Under the Seas

'If ever a human foot is to tread the Pole, it must be a British one!' First Mate Shandon receives a mysterious letter asking him to construct a reinforced steamship in Liverpool. As he heads out for Melville Bay and the Arctic labyrinth, a crewman reveals himself to be John Hatteras, and his lifelong obsession, the Pole. Despite experiencing appalling cold and hunger, the captain treks across the frozen wastes in search of fuel. Abandoned by his crew, Hatteras remains without resources at the coldest spot on earth. How can he find food and explore the Polar Sea? And what will he find at the top of the world? This new translation by the father of Verne Studies brilliantly conveys the hypnotic mood and gripping authenticity of Verne's second novel. This edition also includes the original, censored ending, previously unpublished chapters, and evidence of Verne's plagiarism.

Twenty Thousand Leagues Under the Seas, Or, The Marvellous and Exciting Adventures of Pierre Aronnax, Conseil His Servant, and Ned Land, a Canadian Harpooner

"Twenty Thousand Leagues Under The Sea" is a classic science fiction novel by Jules Verne published in 1870. It tells the story of Captain Nemo and his submarine Nautilus, as seen from the perspective of Professor Pierre Aronnax. The title refers to the distance travelled while under the sea and not to a depth, as 20,000 leagues is over six times the diameter, and nearly three times the circumference of the Earth. The greatest depth mentioned in the book is four leagues. The book uses metric leagues, which are four kilometres each. A literal translation of the French title would end in the plural "seas", thus implying the "seven seas" through which the characters of the novel travel. The book was highly acclaimed when released and still is now; it is regarded as one of the premiere adventure novels and one of Verne's greatest works. Jules Verne (1828-1905) was a French novelist, poet, and playwright best known for his adventure novels and his profound influence on the literary genre of science fiction.

Twenty Thousand Leagues Under the Sea

French naturalist Professor Aronnax has joined a task force to rid the seas of a monster that is terrorizing shipping lanes. But the Professor's mission takes an unexpected turn when he falls overboard to be rescued by a submarine called Nautilus, built by the mysterious Captain Nemo. At first this new journey is exciting, as Nemo takes Aronnax on an adventure through underwater marvels, but soon he realizes that his host's motives may be more sinister than he realized. This triumphant work of the imagination shows the limitless possibilities of science and the dark depths of the human mind.
